

Using the Arguments Logic Bot

<http://t.me/ArgumentsLessonBot>

Pre-requisites:

- You will need a (free!) Telegram account.
- You will need a working internet connection.

How to Start the Bot

1) Using either your computer or mobile device, navigate to: <http://t.me/ArgumentsLessonBot>:

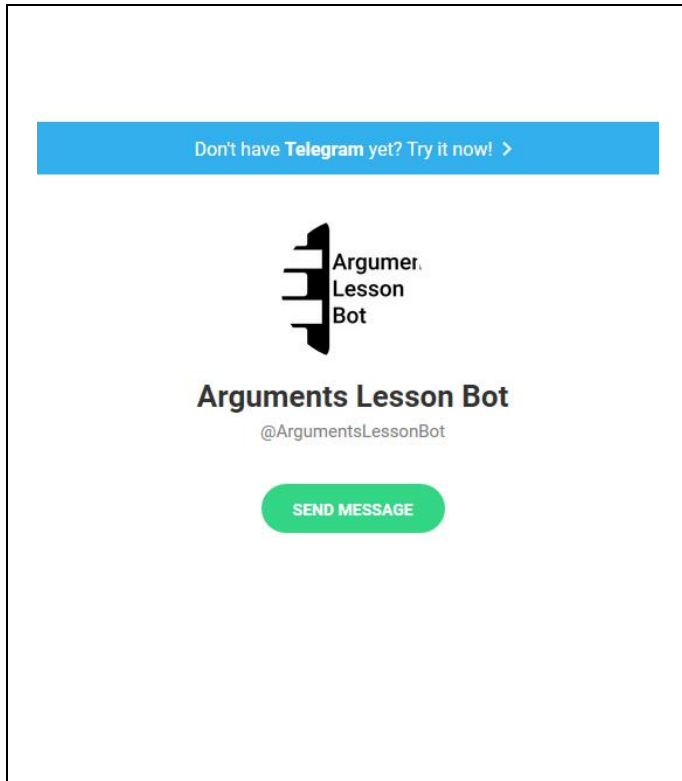

Figure 1: Via Web Browser (Click 'Send Message')

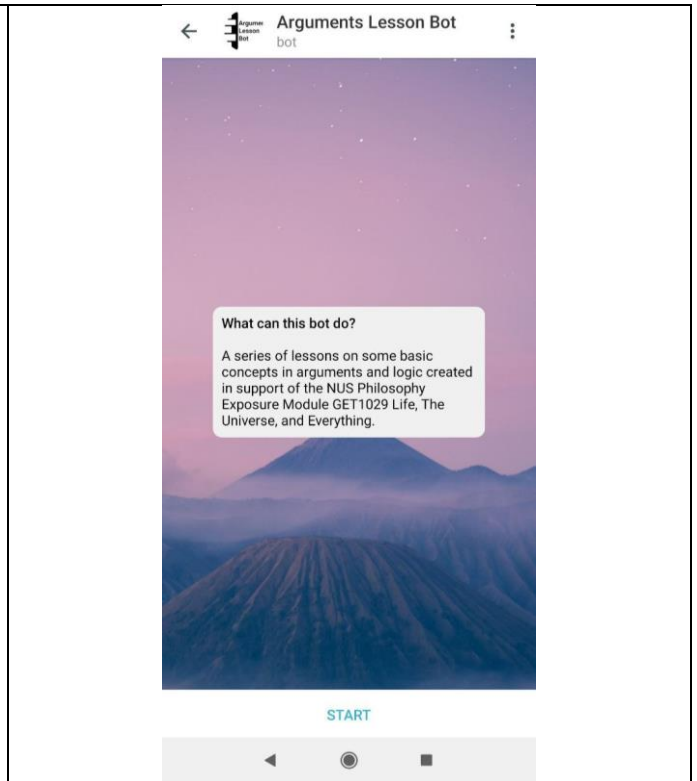

Figure 2: Via Mobile Device (Android)

2) Click on Start to Begin.

In the course of viewing lessons and interactive stories on the bot, the bot might become unresponsive for various reasons. Your current progress might not be retained, but you can restart the bot via the following steps:

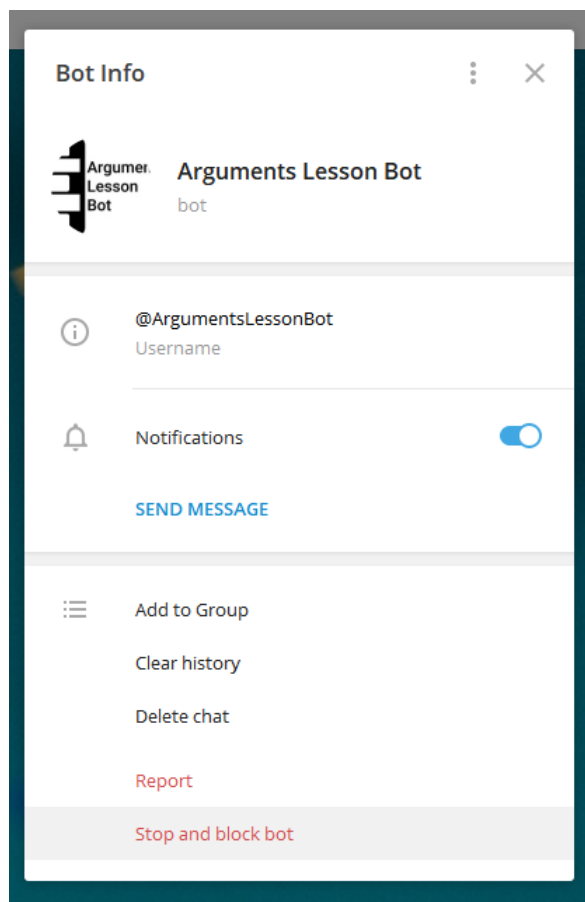

How to Stop & Restart the Bot

For Computer Users (Tested on Telegram Desktop Application, Windows):

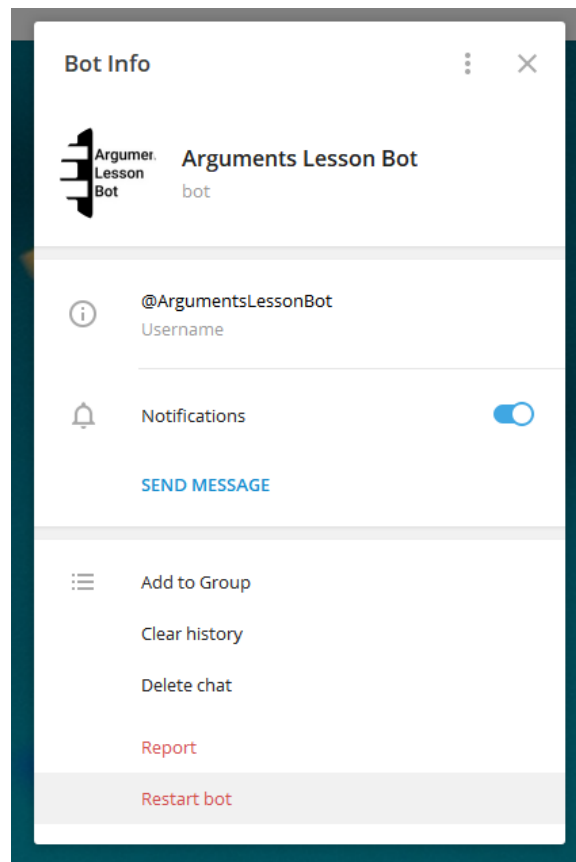

- 1) Click on the top banner within the conversation with the bot:

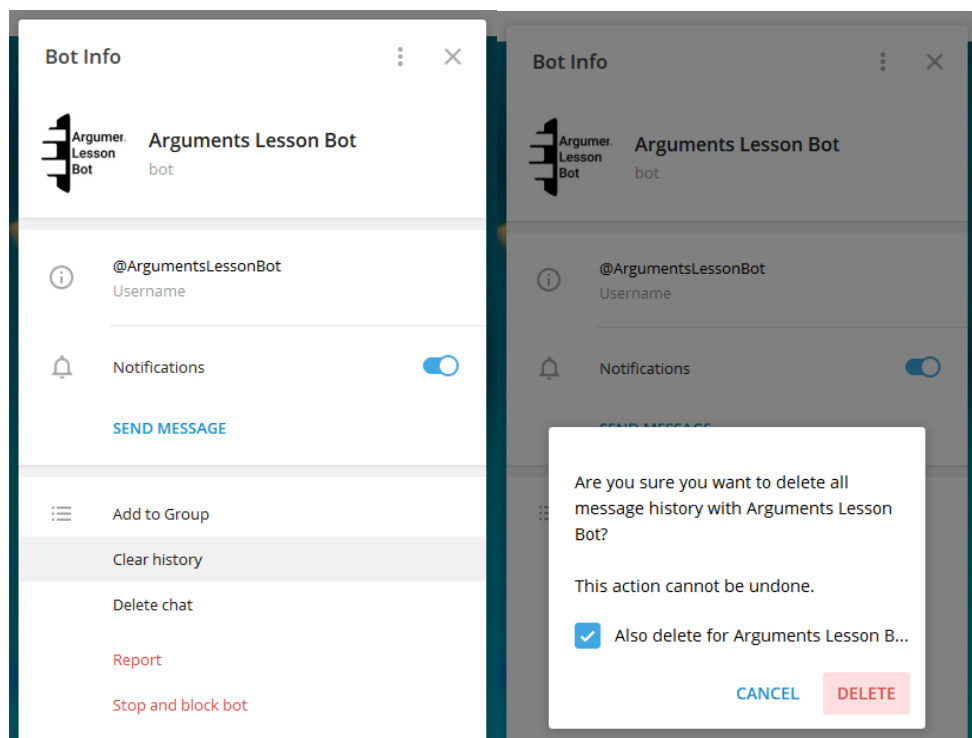

- 2) In the bot profile that opens up, click on 'Stop and Block Bot':

3) Next, click on 'Restart Bot':

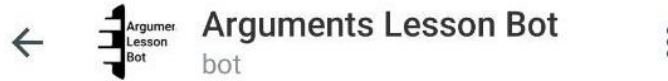

4) You may also wish to 'Clear History' to remove prior conversations within the bot. **Do note that this action is irreversible!**

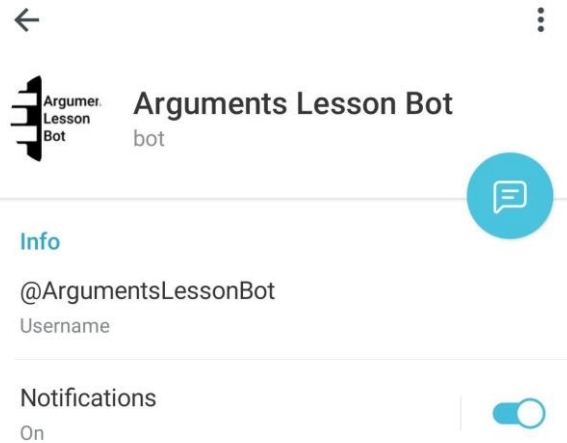

For Mobile Users (Tested on Telegram Application, Android):

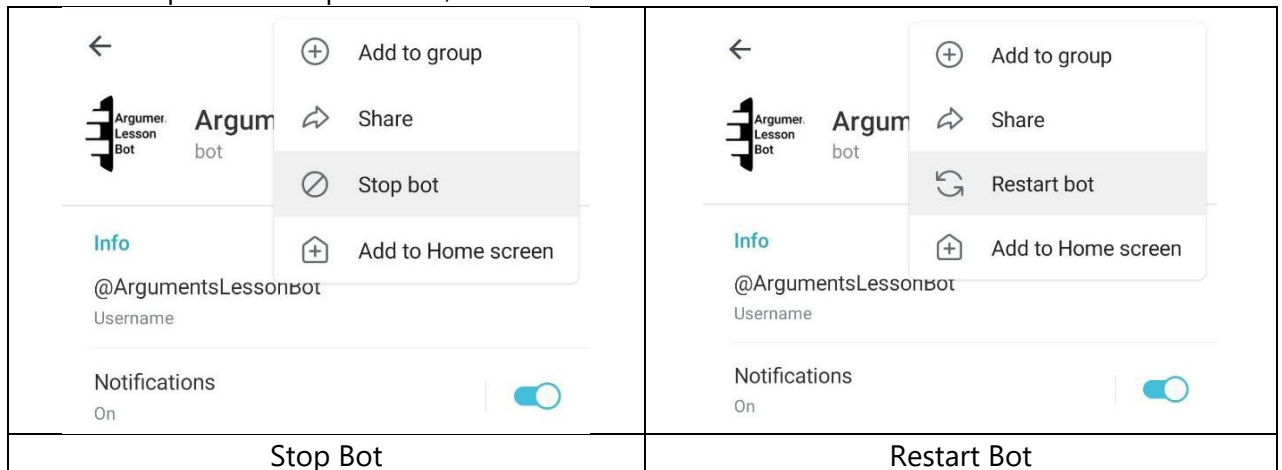

1) Click on the top banner of the conversation with the Bot:

2) Next, in the bot profile that is displayed, click on the triple vertical dots:

3) Click on 'Stop Bot' to stop the bot; then 'Restart Bot' to restart the bot:

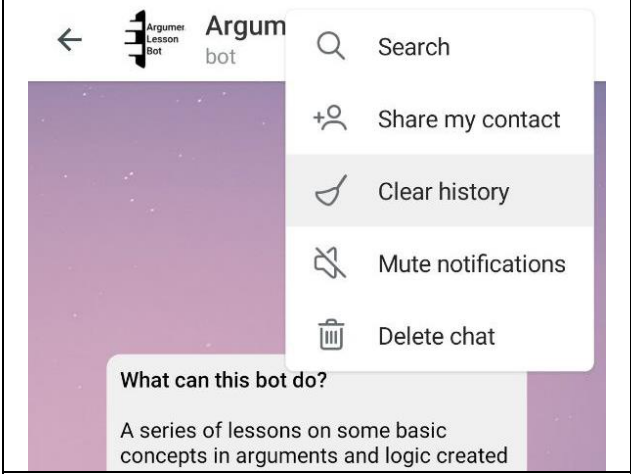

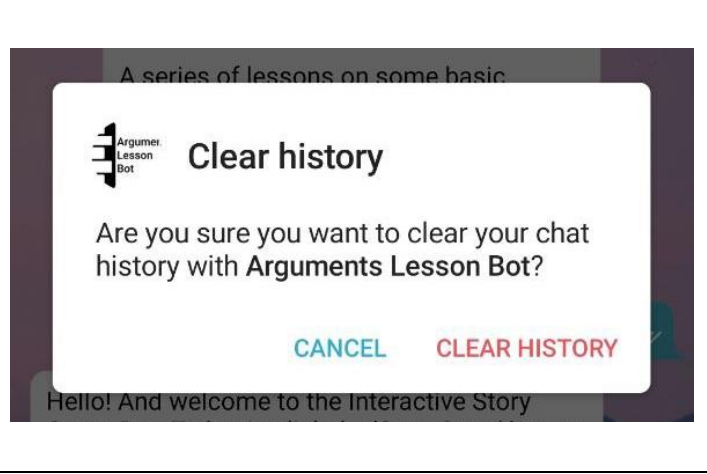

4) You may also wish to 'Clear History' to remove prior conversations within the bot.

Do note that this action is irreversible!

5) Within the main conversation with the bot, click on the triple vertical dots located on the right corner of the top banner:

6) Proceed with the dialog:
