PUMPKIN CARVING PATTERN

INSTRUCTIONS: Cut the lid at an angle. Remove seeds and pulp. Tape or pin the template to the side of the prepared pumpkin. Transfer the pattern by poking through the paper into the pumpkin with a pointed tool, leaving dotted marks along the shape edges. Gray areas will be cut away. When transfer is complete, remove pattern. Using a thin, serrated blade or pumpkin-carving saw, cut along lines using a sawing motion. Work from the center of the design outward. Saw and remove the smallest pieces first.
