SUSTAINABILITY AND 21ST CENTURY BUSINESS SOLUTIONS CERTIFICATE

About Sustainability and 21st Century Business Solutions

In this interdisciplinary 15-credit hour certificate program, you will learn how to design economic- and business-based solutions to 21st century problems that will impact the triple sector. After completion, you will be able to lead your business or organization through the transition to value-driven economic decisions that generate revenue while making society and the environment more equitable and sustainable.

Where can a certificate in Sustainability and 21st Century Business Solutions take me?

The certificate in sustainability and 21st century business solutions will strengthen your skills in microeconomics, project management, thinking in systems, understanding emerging economic, social, and environmental trend lines and how these will impact business practices. It will improve the way you think about relationships between humans and their environments and provide you with the tools to innovate solutions within your existing or future job settings.

As businesses and organizations grow, they will be looking for leaders like you who can implement change. Prospective employers are looking for individuals like you to implement change and find creative solutions for the complex social, economic and environmental problems facing the 21st century.
