**COLLEGE OF ARTS AND SCIENCES BULLETIN FOR THIS PROGRAM:** Go to [THIS PAGE](#) and be sure to select correct Bulletin for your year.

**BIOT-X 498:** Cumulative GPA ≥ 2.500 and consent of instructor required.

**BIOT-X 499:** Cumulative GPA ≥ 3.000, at least 1 credit hour of BIOT-X 498, and consent of instructor required.

**ADMISSION**
Students should apply for admission to the B.S./M.S. degree program between their sophomore and junior years. Consult the Director of the Biotechnology Master’s Degree Program about application timeline and procedures.

**THE FOLLOWING SPECIAL POLICIES APPLY TO THIS DEGREE PROGRAM ONLY:**
1. Up to 30 credit hours from the M.S. program may be applied toward the undergraduate degree.
2. At least 90 credit hours must be taken at the 100–499 level in courses from College of Arts and Sciences disciplines, though most students will need to complete more than this to meet all other requirements.
3. At least 90 credit hours at 100–499 level and all Bachelor of Science CASE requirements must be completed before beginning graduate-level coursework. (See your [Bulletin page](#) for this program, [Degree tab, items 5a-g](#) for list of Bachelor of Science CASE requirements.)

**IMPORTANT NOTES**
- Typically, the BS and MS degrees are conferred simultaneously at the end of the summer after the 5th year.
- For conversations about good fit with this program and information about funding, please consult the Director of the Biotechnology Master’s Degree Program.
- This special program is not actually any faster than completing the standard BIOT BS in 4 years and the standard BIOT MS in 1 year.
- The primary advantage of the B.S./M.S. degree program is that students have the opportunity to develop an extensive, multi-year research project (4 to 7 semesters long) and write a thesis on this project. This is excellent for students wishing to pursue a Ph.D. in Biotechnology research. They do not have this opportunity with either the standard BS degree or the standard MS degree.
