Urban Sustainability

Memphis Metropolitan Planning Issues:
A Regional Perspective

PLAN 7101

Regional Planning
University of Memphis

Graduate Program
City and Regional Planning
PLAN 7101

The tri-state Memphis region, with constellation of cities in Arkansas, Mississippi, and Tennessee. The constellation is a network of places for work, residence, and leisure, differentiated by the size and quality of the built and natural environments, and linked by a wide-ranging variety of physical and virtual flows, offering work-living options as well as posing urban sustainability challenges with extra-local or metropolitan region-wide solutions. Source of map: Memphis Region Source Book (2001)

**Regional Planning PLAN 7101 University of Memphis Graduate Program
City and Regional Planning**

Regional Planning Themes

**How is a Regional City Formed?
How Does a Regional City Function?
How is a Regional City Planned?
How is a Regional City Governed?
Why Does a Regional City World-View Matter?**

Learn from centuries of thinking regionally about sustainable urban design and planning in America and abroad, and from contemporary better practice examples of regional cities—how they are formed, how they function, and how they are governed—

**To Make the Case for
Designing the Future of Memphis as a Regional City**
