Representing Division

Draw a picture or write an equation to represent each problem. Solve the problems any way you choose. Show your work.

1 There are 42 players in a volleyball league.
Each team in the league has 7 players.
How many teams are in the league?

2 A group of friends is sharing 18 slices of pizza equally.
Each friend eats 2 slices of pizza.
How many friends are there?

3 Jessica bought 8 packages of hot dog buns.
She has 64 hot dog buns in all.
How many buns are in each package?

NOTE

Students solve division problems.
