

A Bake Sale

Write an equation for each story problem.
Solve each problem and show how you solved it.

- 1 Zhang made 48 muffins for the bake sale. He can fit 8 muffins in a box. How many boxes does he need for all of his muffins?
- 2 Gina baked 4 sheets of cookies. On each sheet were 12 cookies. How many cookies did she bake?
- 3 Casawn baked 3 cakes. He sliced each cake into 9 pieces. How many pieces of cake are there in all?
- 4 Jane baked 36 dinner rolls. She put 6 rolls in each bag. How many bags did she fill?

NOTE

Students solve multiplication and division problems in story contexts.
