# AGING STUDIES BA

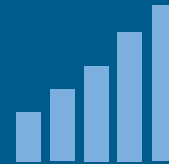

---

## What Is Aging Studies?

Aging studies focuses on the economic, physical, emotional, social, and practical effects of the aging process, beyond clinical medicine, as it applies to the aging population. Our rapidly aging population presents new challenges—and opportunities—in every facet of life.

# AGING STUDIES BA

---

## Why Study Aging?

Aging studies offers many rewarding paths in a field rich with career opportunities.

Populations are aging worldwide. People are living longer, and the number of older persons is increasing. These growth trends will result in a demand for professionals with knowledge and expertise in aging.

You can have a positive influence on the agencies and organizations serving older persons—and the policies that affect all of our lives as we age.
