

Gerontology Research/Policy MS

Department of
Gerontology

This on-campus program prepares students to address issues related to a diverse aging population. The curriculum addresses social, behavioral, and policy science theories, as well as research techniques.

Program Courses Include

- Social Aspects of Aging
- Issues in Aging Policy
- Microeconomics for Policy Analysis
- Psychology of Aging
- Research Methods and Experimental Design
- Statistical Methods and Analysis
- Policy Analysis Techniques

Career Opportunities

- Research Associates
- Policy Analysts
- Organizational Leaders
- Doctoral Studies

Department of
Gerontology

Gerontology Research/Policy MS

Students can study on a part-time or full-time basis and develop the expertise necessary to pursue basic and applied gerontological research. Students gain practical experience conducting research and analysis, and they learn the skills needed to communicate effectively with key stakeholders regarding gerontology and aging policy.
