

Call for Submissions

MAGICC is an ACM Celebration of Women in Computing that provides an affordable, regional, small conference experience for everyone who celebrates inclusion of women and individuals with gender-marginalized identities in computing. The Celebration aims to create community among current and future computing professionals and to provide students with opportunities to present their work, build confidence in their skills, and learn from mentors with shared gender identities who have successful tech careers.

We invite submissions from undergraduate students in the following categories:

- **Research Shorts:** Short talks (5 minutes to present + 5 minutes for questions) about ongoing or completed research related to computing. This is a low-stakes way to prepare for a conference presentation, get feedback on work in progress, or practice public speaking skills.
- **Flash Talks:** Short talks (5 minutes to present + 5 minutes for questions) about projects that are not necessarily research. Submissions are welcome on any topic broadly connected to the theme of the conference.
- **Posters:** 24" x 32" posters about a certain project. Submissions related to computing research, coding projects, efforts to diversify the computing field, or any other topic related to computing are welcome.
- **Birds of a Feather:** Proposals to lead discussion groups centered around a particular topic. These groups provide an informal setting for students to discuss topics relevant to their interests and experiences in computing programs.

Submission Instructions:

a 250-word abstract, the name(s),
affiliation(s), and year(s) of the
presenters:

<https://bit.ly/magicc2025-submissions>

Important Dates:

Abstract submission: Oct. 1, 2025

Acceptance notification: Oct. 8, 2025

Registration deadline: Oct. 29, 2025

Conference: Nov. 1, 2025
