Guide for Manuals

Types and purposes of the manuals

Following manuals are included with SmartLab SE (this system).

- **Guideline for Safe use of the X-ray Diffractometer**
  Before starting to use SmartLab SE for the first time, make sure to read this guideline. This guideline summarizes the cautions to prevent accidents, such as X-ray exposure, electric shock due to contact with high-voltage parts of SmartLab SE, and other fatal accidents or injuries.

- **Getting Started Guide**
  When using SmartLab SE for the first time, read this Getting Started Guide. This “Getting Started Guide” describes the basic operations of SmartLab SE and SmartLab Studio II XRD Measurement plugin (control software part). This Getting Started Guide does not include safety precautions upon handling SmartLab SE. Be sure to read the “Guideline for Safe use of the X-ray Diffractometer” as well.

- **SmartLab SE Instruction Manual**
  When using SmartLab SE for the first time, make sure to read this manual beforehand. Read this manual as necessary, such as when replacing (mounting or removing) optical units or sample attachments.
  This manual describes all hardware configurations, such as optical units and sample attachments, including those that are optional.

- **Others**
  Instruction manuals other than those described above may be included according to the optional components. Before using the optional components for the first time, read all the instruction manuals included with the optional components.
  The installation manual of SmartLab Studio II is included in the installation DVD. Normally, SmartLab Studio II will be installed in your PC before delivery. If SmartLab Studio II should be reinstalled because the PC will be replaced with a new one or whatever reasons exist, read the installation manual.

Following help can be referred to in SmartLab Studio II.

- **User manual and Help topics**
  For details on functions and how to use SmartLab Studio II, refer to the contents of the user manual and help topics of Part Activities. The SmartLab Studio II user manual can be referred to by the contents page displayed after clicking **Manual** in the **File** menu of SmartLab Studio II. The help topics of Part Activities can also be displayed by clicking the ☰ button on the title bar of a panel.
