

### **Huge**

When I was sleeping I was most relaxed. I love holding my hand up while I was sleeping. I don't know why...I just feel really comfortable and stretch. My mom said my dad also like this posture. Like the people said only when cat trust you, they will sleep without guard you. They will sleep with there stomach at the top. Same with my toy, I really like to make him have the same posture. In that way, I feel he really trust me. I never have a pet in the past 18 years. But never stop dreaming to have one. So I'm turning to create my toy as the 'pet'. Hugging it overnight, talking to him, playing his ear. Recently I always cannot fall asleep. Every night when I woke up I saw he lay just beside me. I feel nothing really changed. He is right beside me when I feel bad.
