## 2016 Symposium

Mark your calendar for the 2<sup>nd</sup> Annual  
STEM & Humanities Symposium

sponsored by Baylor's College of Arts & Sciences

**April 7, 2016 — 12:30-5:00**

Mayborn Museum Complex—SBC Theater

## **Theme: The Anthropocene**

### **What is “The Anthropocene”?**

The Anthropocene is a proposed name for the current geological epoch, when humans have replaced nature as the most significant environmental force on Earth.

Addressing grand challenges like climate change and health care, scholarly engagement with the Anthropocene spans virtually every discipline at the university. The solutions must include us all.

For more information about the Symposium, visit
