Infection Control Amplification in Nursing Centers
See Something? Say Something. I CAN.

COACH OBSERVATION TRACKING TOOL

Throughout your day, write down your observations so you can remember and share them with your Infection Preventionist and during huddles with fellow coaches. Your Infection Preventionist might ask you to drop these off in a certain spot for review and to follow up on your recommendations.

I CAN Coach Prompts

- Are staff washing their hands after every encounter?
- Are staff wearing masks and eyewear appropriately? Is there a good fit?
- Are residents wearing masks when outside their rooms?
- Are precaution room carts stocked with proper PPE/equipment and signage on the door?
- Are staff donning and doffing correctly?
- Are staff wiping down equipment including stethoscopes, blood pressure equipment, handles, knobs, lifts, nurse's stations, keyboards and screens?

Date	**Topic/Issues** What are you noticing?	**Notes/Corrections offered**	**Possible Solutions/Recommendations** What might lead to overall improvement?
