Room Information

Contact Information:

For **AV support**:

In Case of an AV Emergency Call:

607-255-0778

Email: Eng. Classtech Support

engrclasstech@cornell.edu

AV Support Availability:

Monday thru Friday, 8:00am to 5:30pm

For **Facilities Assistance**:

Scott Albrecht

sja4@cornell.edu

607-255-6303

For Emergencies

Dial: 911

(CU Police) 255-1111

This room is equipped with:

- 2 projectors for computers or mobile devices
- 1 confidence monitor for projection
- 2 room screens for projection
- Overhead, wireless, and chair microphones
- 2 lecture capture cameras
- Smart annotation podium
- AirMedia capable
- Web video conferencing capabilities (eg. WebEx, Skype, etc.)
- Recording capabilities
- Video conferencing capabilities

Welcome to Gates 114 Projection Quick Tips	40

Audio-Visual Documentation Gates 114

Internet Connection Options

Wired Internet Connection

If you have a **Cornell NetID** use the **Network Connection USB cable**. You will need to register if you haven't already done so.

To grant wired network access to a **Guest without a Cornell NetID**, please email itcoecis-help@cornell.edu at least one business day prior to the class, **with the full name of the person and the Hardware Address (MAC Address) of the computer**.

To access the MAC address of the computer:

Windows 7

1. Click on the **Start Menu**.
2. Click on **Control Panel**.
3. Click on **Network and Sharing Center**.
4. Click on **Local Area Connection**.
5. Click on **Details**.
6. The **Physical Address** is the M.A.C. Address.

Mac:

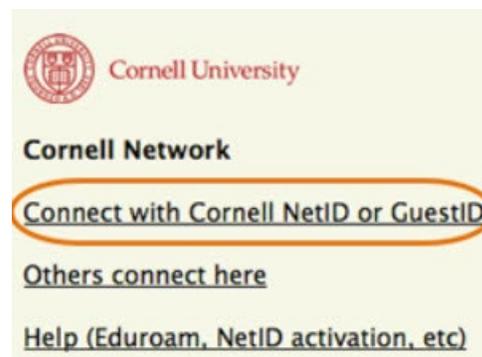

1. Click on the **Apple**.
2. Click on **System Preferences**.
3. Click on **Network**.
4. Click on **Advanced**.
5. Click on **Hardware**.
6. You will see the **M.A.C. Address**.

Wireless Internet Connection

If you have a **Cornell NetID**, use **Eduroam** for Wireless Connection.

RedRover Wireless Connection for Guests

1. Click on **Network icon**.
2. Select **RedRover**.
3. Click **Connect**.
4. Follow the **instructions** provided.

Instructions can be found at:

<http://www.it.cornell.edu/services/wifi/howto.cfm>

Audio-Visual Documentation Gates 114

Lecture Room Projection – Windows

Connection Summary

*These instructions are for laptops and devices using Windows 7. If you are using Windows 8 some steps may be slightly different.

To use the AV System in this room, you will use the white Control Panel on the lectern labeled **Crestron**.

There are 5 steps to setting up the Room Projection:

1. Connect your device
2. Audio setup
3. Annotation setup
4. Change display
5. Recording setup

Input Source Choices

Lectern 1: Devices plugged into the podium on the left.

Lectern 2: Devices plugged into the podium on the right.

AirMedia: Allows sharing of mobile content wirelessly.

Connect Your Device

1. If there is no display on the black **Crestron**, touch the screen to wake it up.
2. Press the screen again to enter the system.
3. Plug either the **VGA & Audio** cables (use the headset jack) or the **HDMI** cable into your computer. These cables are located at the table box labeled Lectern 1.

If no projection: Remove the **VGA** or **HDMI** cable from your computer and reconnect the appropriate cable to check the connection to your computer or see FAQ's.

Audio-Visual Documentation Gates 114

Audio Setup (Optional)

1. Plug the **Audio Input** cable into the headset jack on your device.
2. Check **Audio Send** in appropriate **Projector** box.

If using HDMI:

1. Go to **Control Panel**.
2. Click on **Sound**.
3. Click on **Playback Tab**.
4. Choose **Crestron** as the Default.

Annotation Setup (Optional)

Smart software and **Smart Drives** are **required** to use this device.

1. Plug the **USB** cable labeled **Annotator & AV Bridge** located at the table box labeled Lectern 1 into your computer.
2. Check **Enable Annotation** in the **Projector left** box.
3. Turn the **Smart Monitor** power on.
4. Verify that your content is projected on the **Smart Monitor**.

For more details see **Smart Annotation Instructions** on page 39.

Change Display (Optional)

1. Press **Source Select** on the **Crestron** Screen, if it is not already on the Home screen.
2. **Press and hold** the source item on the top of the **Crestron** Screen (e.g. **People, Content, etc.**) and **drag it** into the appropriate box: **Projector Left, Projector Right** or **Confidence Monitor**.

** If additional configuration is necessary, drag source to the desired destination.*

A screenshot of the Crestron Home Screen. On the left, there is a vertical menu with icons for "Source Select", "Calling & Recording", "Web Conference 'WebEx/Skype'", and "Camera & Content". The "Source Select" icon is highlighted with a hand icon. The main area of the screen displays several source options: "Lectern 1", "Lectern 2", "People", "Content", and "AirMedia". Below these options are three destination boxes labeled "Projector Left", "Projector Right", and "Confidence Monitor".

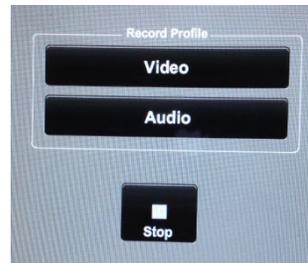

Home Screen

Audio-Visual Documentation Gates 114

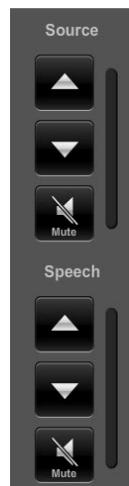

Recording Setup (Optional)

1. Press **Call & Recording** on the **Crestron** screen.
2. Press **Recording** on the lower the **Crestron** screen.
3. Press the option in **Record** you would like to record.
4. When finished recording press
5. To retrieve your recording, itcoescis-help@cornell.edu.

right side of **Profile** that **Stop**. contact:

Volume, Mute and Unmute

By pressing the **Vol Up**, **Vol Down** buttons you can change the **Speech (Microphone)** and **Source (Room Speaker)** volume.

By pressing the **Mute** button, you can mute the **Speech (Microphone)** and/or **Source (Room Speaker)**.

Mute is on when the Mute button is highlighted in Red.

Shut Down and Restart

1. Shutdown the system by touching the power icon in the bottom left of the **Crestron** Screen.

You will have **15** seconds to press **Return to System** to cancel the shut down.

If you do not press **Return to System**, a countdown clock will appear signaling the beginning of a **200** second cool down period.

Audio-Visual Documentation Gates 114

Web-Based Video Conferencing – Windows

Connection Summary

*These instructions are for laptops and devices using Windows 7. If you are using Windows 8 some steps may be slightly different.

To use the AV System in this room, you will use the white Control Panel on the lectern labeled **Crestron**.

There are **3** steps to setting up Web-Based Video Conferencing:

1. Connect your device
2. Input for projection
3. Start conference

Web Conferencing Software

Please note: If you are hosting a conference session, you must install your preferred conferencing software (either WebEx or Skype) on your laptop and, if necessary, obtain a campus account. Google Plus does not require software installation.

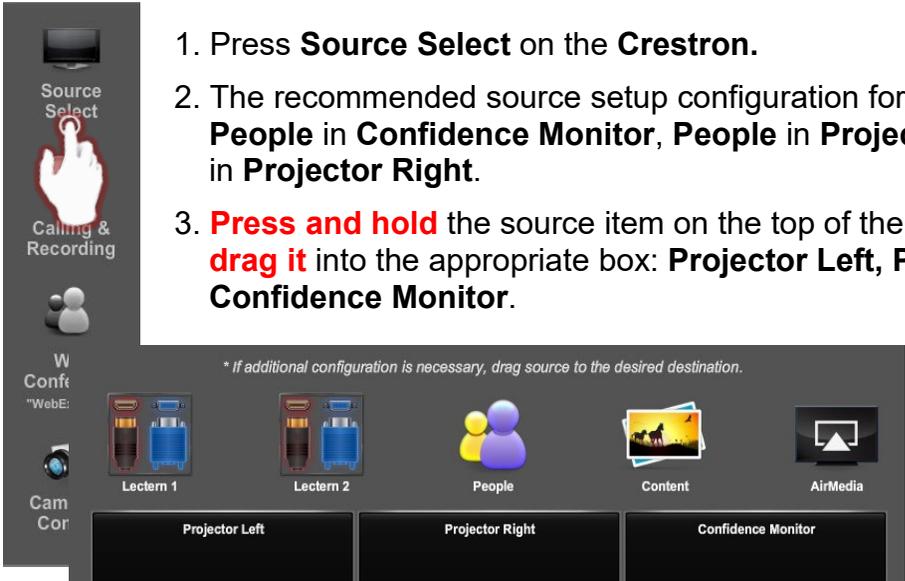

For WebEx instructions see: <http://www.it.cornell.edu/services/webconferencing/>

Connect Your Device

1. Plug the **USB** cable labeled **Annotator & AV Bridge**, located at the table box labeled **Lectern 1**, into your computer.
2. Follow the instructions for **Lecture Room Projection for Windows**, on page **6**, **steps 1 and 2**.

Audio-Visual Documentation Gates 114

Input for Projection

The screenshot shows the Crestron Home Screen interface. On the left, there are vertical labels: 'Source Select' with a hand icon, 'Calling & Recording' with a hand icon, 'W Confr' with a person icon, and 'Cam Cor' with a camera icon. The main area displays a grid of source options: 'Lectern 1', 'Lectern 2', 'People', 'Content', and 'AirMedia'. Below these are three destination boxes: 'Projector Left', 'Projector Right', and 'Confidence Monitor'. A note at the top of the grid reads: '* if additional configuration is necessary, drag source to the desired destination.' A hand icon is shown pointing at the 'Source Select' button.

1. Press **Source Select** on the **Crestron**.
2. The recommended source setup configuration for Video Conferencing is: **People in Confidence Monitor, People in Projector Left, and Content in Projector Right.**
3. **Press and hold** the source item on the top of the **Crestron** screen and **drag it** into the appropriate box: **Projector Left, Projector Right, or Confidence Monitor.**

Home Screen

Start Conference on Your Device

Choose Google Plus, WebEx, or Skype

Google Plus (Hangouts)

1. **Begin or join** a **Google Hangout** Video Call.
2. Click on the round **Gear "Settings"** icon on the top of the **Google Video call page.**
3. Select **UVC** from the Camera drop down menu to use the room camera.
4. Click **Save.**
5. Select **Independent (R.T.C.) Headphones (IDT High Definition Audio codec)** from the Speaker drop down menu.
6. Select **Microphone 2-AV Bridge** for the Microphone.
7. Click **Save**

AirMedia Stand Alone – Wireless Connection

Connection Summary

To use the **Stand Alone AirMedia** in the room, you will use the white Control Panel on the lectern labeled **Crestron**.

There are **4** steps to setting up AirMedia:

1. Lower room screens
2. Download the app/software
3. Project IP address and code
4. Connect to AirMedia

AirMedia allows participants to connect to the Room AV System wirelessly and project content from their device.

AirMedia with the AV System (Optional)

You may also use AirMedia by connecting to the room AV system. You can find these instructions at:

AirMedia for iOS Devices	pg. 26
AirMedia for Android Devices	pg. 29
AirMedia for Laptops	pg. 32

Lower Room Screens

1. Locate the screen controls on the wall by the main door, labeled **Screen Controls**.
2. Press the **down arrows** to lower the screen.

Audio-Visual Documentation Gates 114

Download the App/Software

1. Make sure the device you are connecting to AirMedia is **connected to Wi-Fi**.
2. Download the free **AirMedia App/Software** for the selected device at:
http://www.crestron.com/products/airmedia_mobile_wireless_hd_presentations/#connect

(For instructions on connecting to wireless internet, see the **Internet Connection Options** on page 5.)

Project IP Address and Code

1. If there is no display on the **Crestron** screen, tap the screen with your finger.
2. Press **AirMedia** on the **Crestron** screen.
3. **By default**, **AirMedia** will be displayed the **Left Projector**.
4. **AirMedia** may take a minute or two before it is projected on the room screen.
5. Verify the **IP Address** and the **Code** are projected on the room screen.

on

Connect to AirMedia

1. **Start the AirMedia App/Software** on the chosen device.
2. **Locate the instructions** for your device and proceed with **Step #4** on the instructions: **Connect to AirMedia**.

There are **5** steps to setting up AirMedia:

1. Connect your device
2. Download the app
3. Project AirMedia
4. Connect to AirMedia
5. Choose content to project

AirMedia allows participants to connect to the Room AV System wirelessly and project content from their device.

Stand Alone AirMedia (Optional)

AirMedia can also be used without connecting to the room AV system. The **Stand Alone AirMedia** instructions can be found on page **24**.

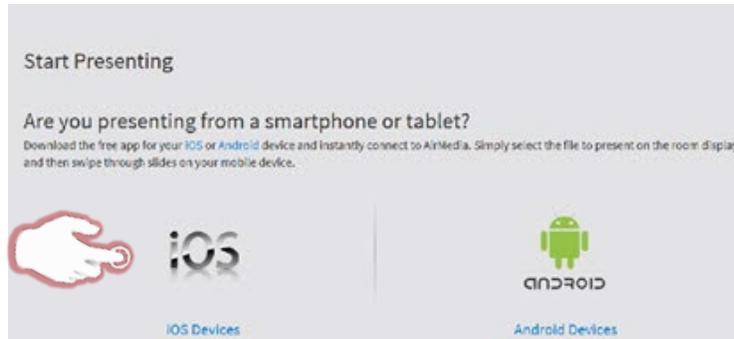

Connect Your Device

1. Follow the instructions for **Lecture Room Projection**. Choose the instructions for **Windows** on page **6** or **Mac** on page **15**, **steps 1 and 2**, depending on the device you are connecting to the room's **AV System**.

Audio-Visual Documentation Gates 114

Download the App

1. Make sure the device you are connecting to AirMedia is **connected to Wi-Fi**.
2. Download the free **AirMedia App** for the selected device at:
http://www.crestron.com/products/airmedia_mobile_wireless_hd_presentations/#connect

(For instructions on connecting to wireless internet, see the **Internet Connection Options** on page 5.)

Project AirMedia

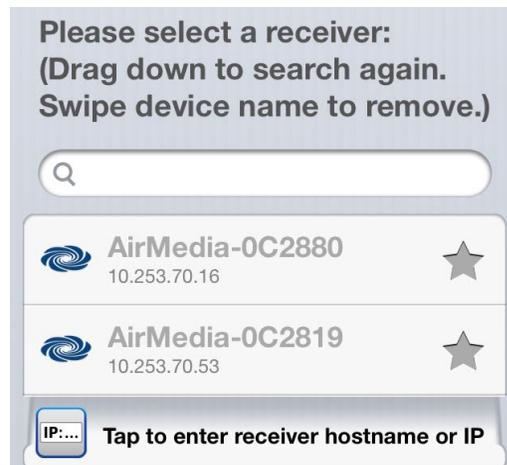

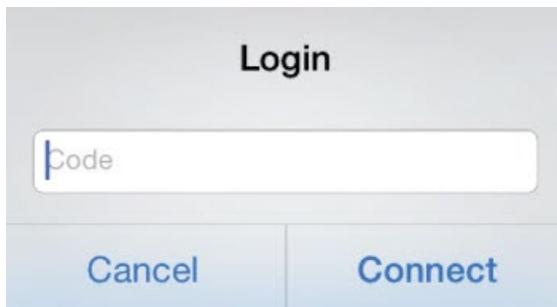

1. Choose **Source Select** on the **Crestron**, if the home screen is not already displayed.
2. Press **AirMedia** on the **Crestron** screen either on **Projector Left**, **Projector Right**, or **Confidence Monitor**, depending on where you want the content to be projected.
3. **Verify that AirMedia** is projected on the room screen.
4. **By default** both the **IP Address** and **Code** are shown at the top of the room screen.

A screenshot of the Crestron interface. On the left, there is a vertical menu with icons and labels: "Source Select" (with a hand icon), "Camera & Recording", "Web Conference 'WebEx/Skype'", and "Camera & Content". The main display area shows the AirMedia app interface. At the top, it displays the IP address "http://AirMedia-01f8b0 (192.168.0.120)" and the code "Code: 5808". Below that, there is a blue arrow pointing to the text "Address Here" and the AirMedia logo.

Audio-Visual Documentation Gates 114

Connect to AirMedia

1. **Start the app** on the chosen device.
2. If the **IP address** appears on the device, verify it is the same as projected on the room screen.
3. Choose the **correct IP address** on your device.
4. Enter the **AirMedia Code** that is projected on the room screen.

Choose Content to Project

1. Choose the content to project from the chosen device.

Video Conferencing

Connection Summary

To use the AV System in the room, you will use the white Control Panel on the lectern labeled **Crestron**.

There are **5** steps to setting up Video Conferencing:

1. Connect your device
2. Input for displays
3. Content for remote site
4. Select camera
5. Place the call

Input Source Choices

Laptop 1: Device plugged into the podium on the left.

Laptop 2: Device plugged into the podium on the right.

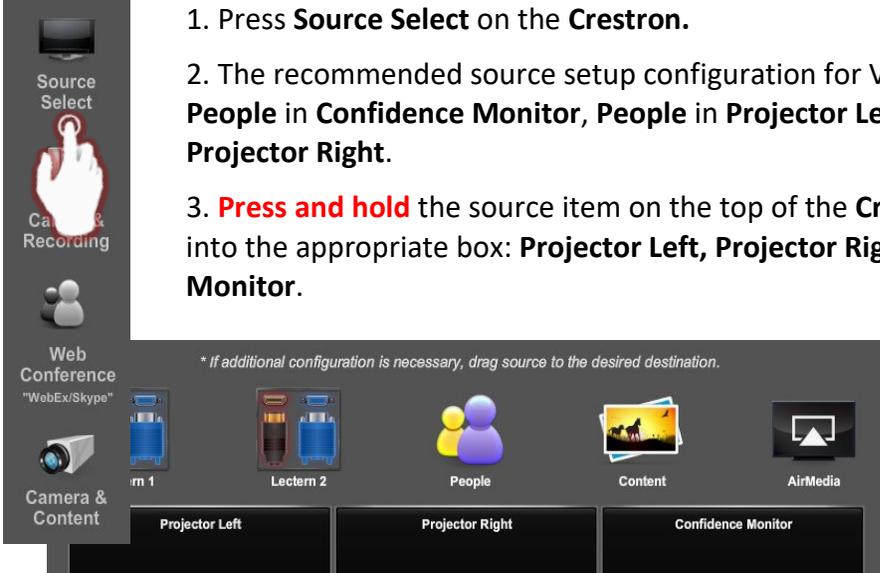

AirMedia: To allow people to share laptop or mobile content wirelessly.

Connect Your Device

1. Plug the **USB** cable labeled **Annotator & AV Bridge**, located at the table box labeled **Lectern 1**, into your computer.
2. Follow the instructions for **Lecture Room Projection**. Choose the instructions for **Windows** on page **6** or **Mac** on page **15**, **steps 1 and 2**, depending on the device you are connecting to the room **AV system**.

Audio-Visual Documentation Gates 114

Input for Displays

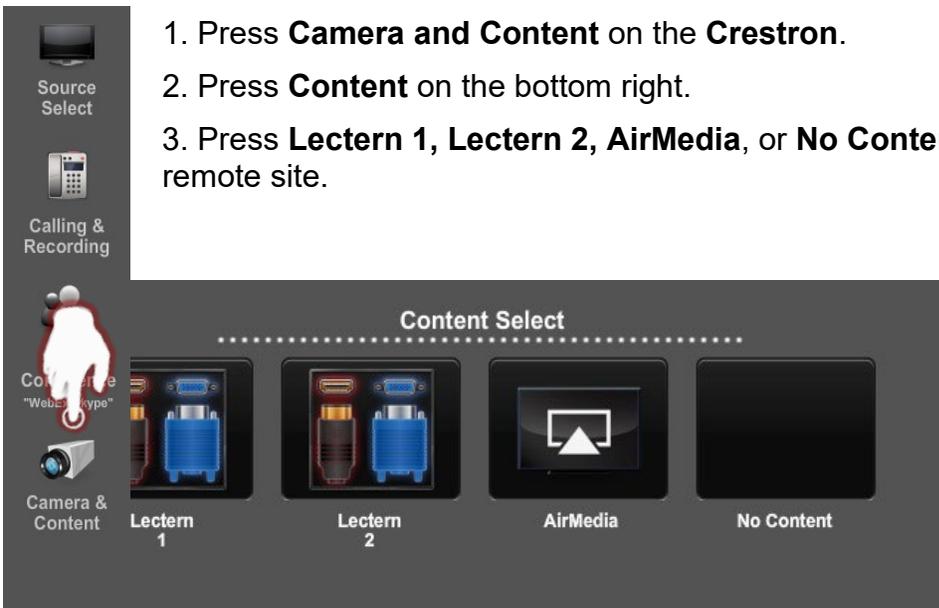

The screenshot shows the Crestron Home Screen interface. On the left, there is a vertical menu with icons for 'Source Select', 'Calling & Recording', 'Web Conference "WebEx/Skype"', and 'Camera & Content'. The main area displays a grid of source selection options: 'Lectern 1', 'Lectern 2', 'People', 'Content', and 'AirMedia'. Below these are three destination boxes: 'Projector Left', 'Projector Right', and 'Confidence Monitor'. A hand icon is shown hovering over the 'Source Select' menu item. A note at the top of the main area reads: '* If additional configuration is necessary, drag source to the desired destination.'

1. Press **Source Select** on the **Crestron**.
2. The recommended source setup configuration for Video Conferencing is: **People** in **Confidence Monitor**, **People** in **Projector Left**, and **Content** in **Projector Right**.
3. **Press and hold** the source item on the top of the **Crestron** screen and **drag it** into the appropriate box: **Projector Left**, **Projector Right**, or **Confidence Monitor**.

Home Screen

Content for Remote Site

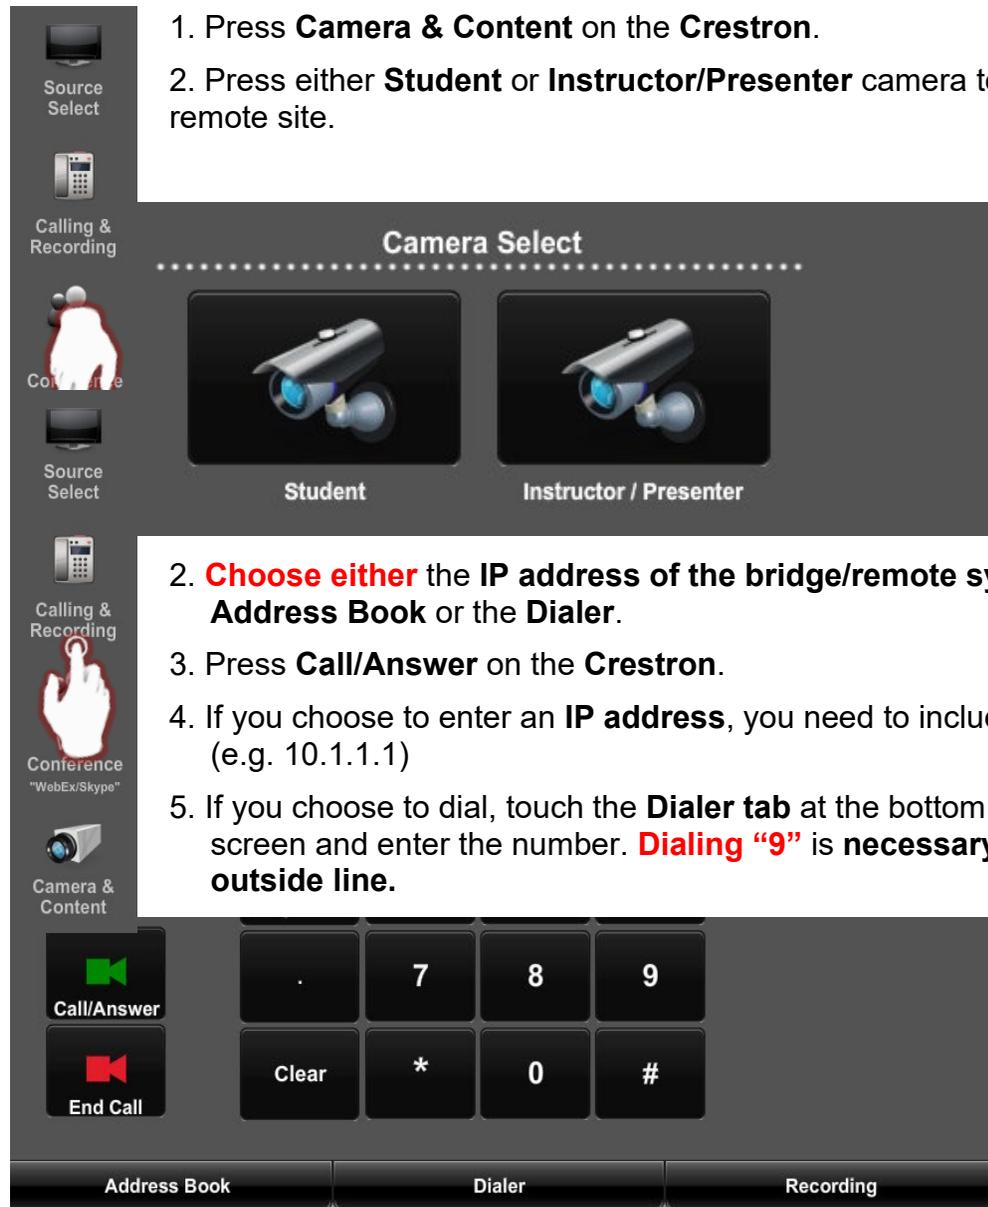

The screenshot shows the Crestron Content Select interface. On the left, there is a vertical menu with icons for 'Source Select', 'Calling & Recording', and 'Camera & Content'. The main area displays four source selection options: 'Lectern 1', 'Lectern 2', 'AirMedia', and 'No Content'. A hand icon is shown hovering over the 'Calling & Recording' menu item. The title 'Content Select' is centered at the top of the main area.

1. Press **Camera and Content** on the **Crestron**.
2. Press **Content** on the bottom right.
3. Press **Lectern 1**, **Lectern 2**, **AirMedia**, or **No Content** to send to the remote site.

Audio-Visual Documentation Gates 114

Select Camera

1. Press **Camera & Content** on the **Crestron**.

2. Press either **Student** or **Instructor/Presenter** camera to send to the remote site.

Place the Call

1. Press **Calling and Recording** on the **Crestron**.

2. **Choose either** the IP address of the bridge/remote system, the **Address Book** or the **Dialer**.

3. Press **Call/Answer** on the **Crestron**.

4. If you choose to enter an **IP address**, you need to include the periods (e.g. 10.1.1.1)

5. If you choose to dial, touch the **Dialer tab** at the bottom of the **Crestron** screen and enter the number. **Dialing "9"** is necessary to obtain an **outside line**.

Smart Annotation

Connection Summary

To use the AV System in the room, you will use the white Control Panel on the lectern labeled **Crestron**.

There are **5** steps to setting up Smart Annotation:

1. Connect your device
2. Download software
3. Enable annotation
4. Install drivers
5. Calibration

You **must** have the **Smart software** installed on your computer to use this device.

Support

Additional information about **Smart Annotation** can be found at:

http://knowledgebase.force.com/pk_Home?l=en_US&q=24%20hd

Connect Your Device

1. Follow the instructions for **Lecture Room Projection**. Choose the instructions for **Windows** on page **6** or **Mac** on page **15**, **steps 1 and 2**, depending on the device you are connecting to the room **AV system**.

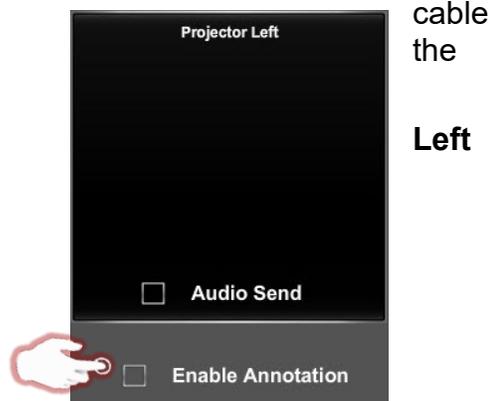

Download Software

1. Smart Podium software can be found at:
<http://smarttech.com/Downloads>
2. Select “**SMART Product Drivers.**”

Audio-Visual Documentation Gates 114

Enable Annotation

1. **If not already plugged in:** Plug the **USB** labeled **Annotator & AV Bridge**, located at table box labeled **Lectern 1**, into your device.
2. Check **Enable Annotation** in the **Projector** box.
3. Turn the **Smart Monitor** on.
4. Verify your content is projected on the **Smart Monitor**.

Install Drivers

1. **Be sure the USB** cable labeled **Annotator & AV Bridge**, located at the table box labeled **Lectern 1**, is connected to your device.
2. The drivers will install automatically when the **USB** is plugged in.

Calibration

1. Press on the **Orient Button** located in the frame above the Smart Podium screen, at the far right.
2. Follow the on-screen instructions using the **Smart Podium Pen**.

Button	Description
	Press this button to launch the Screen Capture Toolbar.
	Press this button to launch SMART Notebook software or SMART Meeting Pro software.
	Press this button to launch the on-screen keyboard.
	Press this button to erase ink from your screen with the tethered pen.
	Press this button to write on your screen in black ink with the tethered pen.
	Press this button to write on your screen in red ink with the tethered pen.
	Press this button to write on your screen in green ink with the tethered pen.
	Press this button to write on your screen in blue ink with the tethered pen.
	Press this button to use the tethered pen to select objects, control your computer and to left-click.
	Press this button to use the tethered pen to perform a right-click or control-click on the screen.
	Press this button to launch the online Help for SMART Notebook software or SMART Meeting Pro software.
	Press this button to start the orientation procedure.

FAQs

Crestron

Q. What if the Crestron Screen goes to shut down mode after I plug in the VGA or the HDMI cable?

A. Press the green Return to System button on the Crestron screen.

Q. The room's screens do not come down when I plug the VGA or HDMI cable into my computer.

A. Use the wall mounted screen controls to put the screens down.
