

**BROWDER +
LeGUIZAMON**
& ASSOCIATES, INC.

Announcement

Structural Engineer – Entry Level

February 2022

Job Description

Browder & LeGuizamon is pleased to announce the opening of new positions for entry level structural engineers.

Preferred educational background includes Master's or PhD in Civil Engineering with a structural engineering focus.

Engineers in these positions will be involved in structural engineering design and modeling of a wide variety of structures including high-rise, low-rise, residential, and commercial buildings in virtually every building material available.

Experience with Autodesk Revit as well as structural engineering analysis and design software packages (such as ETABS, SAP2000, ADAPT, ...etc) are highly valued skills in this selection.

All interested applicants should send their resumes and cover letters to careers@blaengineers.com

Company Profile

Browder + LeGuizamon and Associates, Inc. is a consulting structural engineering firm with immense experience and versatility. Since its founding in 1981, the company has created the structural design for more than 6,000 projects and continues to lead the industry in innovation and expertise. With registrations in most of the states in the country, Browder + LeGuizamon has completed projects across the United States and abroad. In addition to engineering of new construction, Browder + LeGuizamon has completed numerous renovation projects involving extensive structural modifications and retrofitting. Structural systems include steel, masonry, timber, and concrete (reinforced, prestressed, and post-tensioned).
