

inventaprint

ABOUT US

Inventaprint (inventaprint.com) is an online platform that helps scaling companies get their products made by connecting them with vetted manufacturers. Our mission is to democratize the innovation process by simplifying it.

As Innovators, we know just how hard it is to find a manufacturer who can accommodate lower volume orders, while still creating high-quality products. After continuing to run up against this problem ourselves, we set out to track down the best manufacturers around the country.

When Innovators sign-up for Inventaprint, they get immediate access to our network of the very best manufacturers in the country. We've personally handpicked each and every one with the serious solo inventor and scaling company in mind.

These are good, honest people, who value quality as much as we do. They're set-up to support both low and high volume orders, carry all the top-notch certifications and don't create a single part without reviewing each Innovator's order and offering their suggestions.

To further simplify the process, all manufacturer communication, drawing reviews, orders, re-orders, payments and shipping takes places on our easy to use platform. The intellectual property developed during this process remains the property of the Innovator.

PROJECT SPONSORSHIP CONSIDERATIONS

In order to receive the \$500 team sponsorship, the below criteria must be met:

1. Project is within one of the below spaces;
 - a. Military
 - b. Medical Device
 - c. Robotics
2. Team must utilize the Inventaprint platform/services during the project
