### Worksheet #3

1. In one paragraph, summarize the main argument of the article by Neumann.

2. We are now going to briefly explore Bolivia's performance. Go to the Bolivia page of the CIA's World Factbook: <https://www.cia.gov/library/publications/the-world-factbook/geos/bl.html> Scroll down and click on the "Economy" tab. Using the information, fill out the following table:

Indicator	1999	2011
Gini Index for Bolivia		

Now go to the World Bank website (<http://data.worldbank.org/indicator>), download the GDP growth rate (annual%) data, use it to fill out the following table:

Indicator	2007	2008	2009	2010	2011
GDP growth rate for Bolivia (annual %)					
GDP growth rate for Latin America and the Caribbean (developing only) (annual %)					

3. Does the data support the argument that Bolivia has grown significantly since Evo Morales became President in 2006, particularly when compared to its neighbors? Has that growth also come with a reduction in income inequality? Why do you think this is the case?
