

Shattering the glass ceiling for women with engineering for social good

Kaitlin Rizk will discuss her work using AI to improve women's outcomes during child birth in Ethiopia. She herself persisted as an Egyptian woman in STEM, graduated from Georgia Tech in Industrial Engineering, and proudly advocates for anyone to try STEM, AI, and more. Today, she works at Accenture, a technology company providing innovative and new technology to its clients so they can operate at their best. She will share her AI experiences at Accenture and how they are empowering people to try AI and STEM.
