## *Hand Exoskeleton Study for Individuals with Spinal Cord Injury*

---

### Seeking volunteers for user studies involving a new hand exoskeleton

**Able-bodied participants** must:

- Be at least 12 years old
- Have full hand function

**Participants with SCI** must:

- Be over 12 years of age
- Have had a traumatic spinal cord injury for at least 1 year
- Be medically stable

The goal of this study is to develop an understanding of an efficient and effective exoskeleton for SCI hand rehabilitation.

Study compensates \$10/hour.
