

How to get color printing from Library West Common?

The procedure to do color printing on “Library West Commons Lab” is the same as black and white printing in “Library West Commons”. The only difference is that the job has to be sent to “\\samba1\lwccdr-ps” instead of “\\samba1\lwcbw-ps”. But color printing costs 5 times more than the usual black and white printout. Therefore, it is recommended that students only print those pages with color images using this facility. Since the lab is located inside the main library, Library West Commons has the same hours as the main library, and printing can be done whenever the lab/library is open.
