---

**Required Skills:**

No Preference, This project will build upon a previous project which was written in Python, No Preference, No Preference

**Preferred Team**

**Communications:**

Conf call, Skype

**Data Sources:**

Patient authentication via patient portal, medication lists in EHR, problem lists in HER

**Other Items:**

I have a detailed description of the project created in a word document. Also, I am also involved in a second project submitted by Dr. Mario Maruthur

**Team Info:**

Developer

**Additional Mentors:**

Zack Eyre

---

MY AGENDA APP

---

The application will allow for patients and physicians to partner to create detailed agendas for clinic visits

---

PROJECT OBJECTIVES

---

The define specific agenda items to be dealt with at health care visits, to link specific items to be addressed to the problem list in the health care record, and to get patient input on problems listed in the electronic medical record

---

SUCCESSFUL PROJECT

---

The scope of work will be narrowed down to a tangible deliverable for the timeframe defined in the coursework.
