---

**Required Skills:**

No preference.

Previous application that can be built upon was written in Python.

Need familiarity with OCR / imaging apps.

**Preferred Team Communications:**

Conference Call, Skype

**Data Sources:**

Medication lists in EHR, Patient authentication via patient portal

**Other Items:**

N/A

**Team Info:**

Needs a Developer. Allows 2 teams of 4-6 members.

---

PHOTOCAPTURE OF MEDICATION AND MEDICATION RECONCILIATION

---

We want to create an application that will allow patient to photograph their medication bottles and reconcile what they are taking at home with what is listed in the EHR.

---

PROJECT OBJECTIVES

---

Improved reconciliation of what is recorded in the EHR and what patients are actually taking.

---

SUCCESSFUL PROJECT

---

To Be discussed.
