# KUHU GUPTA

---

[kuhu.gupta@gatech.edu](mailto:kuhu.gupta@gatech.edu)

---

## **Required Skills:**

HTML, JavaScript, Web Application, Responsive Design, Python

## **Preferred Team Communications:**

Conference Call, to be discussed

## **Data Sources:**

To Be discussed.

## **Other Items:**

Project has time zone flexibility. Mentors and students will determine a good time for virtual meeting

## **Team Info:**

Needs a Developer, DBA, Project Manager. Allows one team of 4-6 members.

---

# SEXUALLY TRANSMITTED DISEASES INFORMATION APP

---

Sexually transmitted diseases (STDs) are among the most common infectious diseases in the United States today. More than 20 STDs have been identified and they affect an estimated 19 million men and women in this country each year. The annual treatment cost of STDs in the United States is estimated to be in excess of \$14 billion. Thus, it becomes important to create awareness as well as provide easy availability of resources. Build an app where the user is given daily notifications regarding information about different STDs as well as ways to prevent that. The user could also enter his age and symptoms and the app can suggest possible diseases as well as suggest doctors in his/her location to book an appointment for counselling as well as treatment.

---

## PROJECT OBJECTIVES

---

Build an application to create awareness and suggest treatment plans for sexually transmitted diseases. Moreover, book an appointment or counselling session with the concerned doctor.

---

## SUCCESSFUL PROJECT

---

Aesthetically pleasing web application. Information is presented to the user in an intuitive manner.
