

ECE 4371 (Special Topics 4891) Antenna Engineering Lab Summary

Offering 1: Spring 2014 (18 students)

Offering 2: Spring 2015 (24 students)

Offering 3: Fall 2015 (16 students)

This lab accompanies ECE 4370 Antenna Engineering, which had been once per year. Due to strong student enrollments (partly due to the popularity of this accompanying lab course where students design, simulate, build, and test antennas), we added a Fall 2015 section. Overall, student feedback on the lab has been positive (see attached evaluations).

A listing of experiments typically performed over a semester can be found at

<http://www.propagation.gatech.edu/ECE4370/labs/labs.html>

The current syllabus can be found at
