

Research Study

For Children Ages 5 to 14

Visit the NeuroLearn Lab at Georgia State University

We need typical children to help us study how the brain works. We would like to determine how typical children's brains function during language, and learning tasks. We will see 100 children over 2 years.

- * 1 visit to GSU
- * 3 - 3 1/2 hours
- * Compensation: \$75 + a toy
- * See your child's brain at work!
- * Help us create language treatments
