</table>

Things To Plan -

Start Your Research 6-12 Months in Advance

- Identify locations where you're interested in studying - at least 2 or 3
- Research the locations’ cultural attitudes towards disability
- Connect with NU’s Global Experience Office
  - Are there students you could contact who have studied in your preferred locations?
  - Are there additional resources that would provide information about the study-abroad experience in those locations?
- Locate the primary contact for accommodations at the host institution
- Check host institution’s website and research the accommodations process
- Gather and prepare your documentation
- Talk to your doctor and any other treatment providers
- Consult medication travel guide
