

# Registering to the SHU Wireless Network

"The better way to WiFi"

Laptops, phones, and other personal devices can now be registered through a new, easier web portal. Students who are active on campus can register and connect up to 10 personal devices.

## How to Get Registered

### Connect to SHU-KeyGen

Connecting to SHU-KeyGen will begin the registration process. Once the device has connected, a registration page should pop up. On a phone or laptop, you may need to open a web browser for this to occur.

### Enter Your Information

A bit of info is needed before you can connect. Your first and last name are needed, along with an email address and phone number (optional). The email and phone number must be valid to communicate further instructions to get connected.

### Get Your Access Key

After submitting the form, a page will be brought up with an Access Key unique to your account. An email and text message, if applicable, will be sent to the contact details provided with information on how to get connected.

### Get Connected

Connect to SHU-PPSK with the Access Key provided. This key is valid for up to 10 devices, allowing for multiple devices to connect without needing to go through the setup process on every device. Keep your Access Key safe, as it is unique to your account.

#### Questions? Want to know more?

Contact us at (517) 264 7655 or email us at [helpdesk@sienaheights.edu](mailto:helpdesk@sienaheights.edu). We are also available at the 3<sup>rd</sup> floor of Dominican Hall.
