

JAMF Connect -Sync Password

After changing your network password, log in to Entra to synchronize **your account**.

Log on to **Microsoft Encarta** using your username@sienaheights.edu, and **type in your new password**.

Notice the **Authenticate** and the **Connect** options in the middle top of the desktop.

The last **menu** is Match **your password**. Type your **old password** into the menu box, and **then tap on the sync button**.

Next time, using the same device, your new password allows synchronization to the device, and you can log in using your local account.
