CALL FOR ARTICLES

International Journal of Multimedia Data Engineering and Management

An official publication of the Information Resources Management Association

The Editor-in-Chief of the *International Journal of Multimedia Data Engineering and Management* (IJMDEM) would like to invite you to consider submitting a manuscript for inclusion in this scholarly journal.

MISSION

The primary objective *International Journal of Multimedia Data Engineering and Management* (IJMDEM) is to promote and advance multimedia research from different aspects in multimedia data engineering and management. It provides a forum for U. researchers, scientists, industry professionals, software engineers and graduate students who need to be become acquainted with new theories, algorithms, and technologies in multimedia engineering, and to all those who wish to gain a detailed technical understanding of what multimedia engineering involves. Novel and fundamental theories, algorithms, technologies, and applications will be published to support this mission.

COVERAGE:

- Content-based retrieval (image, video, audio, etc.)
- Image/video/audio databases
- Learning support for multimedia data
- Multimedia data engineering
- Multimedia data indexing
- Multimedia data mining
- Multimedia data modeling
- Multimedia data storage
- Multimedia databases
- Multimedia systems
- Multimodal data analysis
- Network support for multimedia data
- New standards
- Relevance feedback
- Security support for multimedia data
- Technologies and applications
