Journal Voucher Processing

Journal Vouchers prepared during the **year end close process** should be completed as follows:

- Journal Vouchers prepared during the **June I close (Period 12)** should be prepared by inserting a date of June 30, 2023, on the web journal form. The June 30, 2023, date will assure the journal is processed during the **June I close (Period 12)**.
- Journal Vouchers prepared during the **June II close (Period 991)** should be prepared by selecting the Adjustment Period field and selecting **Period 991**.
- Journal Vouchers prepared using the **Accrual/Deferral** functionality are transactions that are being accrued at year end with an automatic reversal of the accounting entry in a future accounting period. If processing an accrual of expense or deferral of revenue journal, select the option for JV Type on the front page of the journal input screen as "**Accrual/Deferral JV**" and then enter a Reversal date of July 1 or later for the upcoming Fiscal Year (2024).
- The Accrual/Deferral functionality will create a WEB journal dated as entered in the Journal date field. A second journal voucher *will automatically be created* dated as of the Reversal date, with debits and credits reversed. *The WEB journal id will be the same for both journals.*
- The Journal Voucher form will **not permit** grant transactions during **Period 991/992**. All grant activity should be finalized in the **June I close (Period 12)**.
- Journal Vouchers for fiscal year 2024 prepared in July (Period 1) during the fiscal year 2023 close periods should be prepared by using the **Journal Date field** and dating the journal as appropriate, i.e. July 15, 2023.

Financial data considerations during the year end close process:
