Questions? Email Peggie Birch  
pbirch@udel.edu

### FAQs

**Q:** Can I participate if I don't teach computer science or have no CS background?

**A:** YES! We invite content area teachers with all types of CS experience, especially those with zero to minimal experience.

**Q:** But I have to teach the content standards...

**A:** And you will. We'll focus on integrating culturally responsive pedagogy and computational thinking concepts with content that you are required to teach. We will also explore computer science resources and lessons appropriate for your grade level and content area of interest.
