## Gilpin Falls Covered Bridge Rehabilitation

Cecil County, Maryland

June 25, 2009

The Delaware T<sup>2</sup> Center coordinated a tour of the rehabilitation project for the Gilpin Falls Covered Bridge in Cecil County, Maryland. Attended by some twenty five University of Delaware staff, faculty, and students, together with several representatives from Delaware Department of Transportation (DelDOT), the Cecil County Department of Public Works hosted the tour, providing excellent historic background related to both the bridge itself and the rehabilitation project that has been long in the making.
