Concrete Best Construction Practices

Training Workshop

**Thursday, May 4, 2023
8:30 a.m. to 12:30 p.m.**

Location:

Office of Performance Management
Edgehill Shopping Center
43 S. DuPont Hwy. Dover, DE 19901

Workshop Overview:

Whether it is your own crews placing concrete or a contractor, be a good consumer and insist on a durable product. In particular, too much of our sidewalk, curbing, and other common elements are failing prematurely as a result of too much water in the mix, adding water during finishing, finishing the surface too soon, inadequate curing, and other factors.

We are expected to build high quality concrete elements and the good news is that we can. Like many other examples, the construction practices we employ can be a determinant factor in how well and how long these investments perform for us. This workshop is basic and intended for those with minimal or even no experience with concrete. However, those with greater experience are welcome to attend and contribute to the discussion. Topics will include a basic understanding of concrete properties and mixes, an examination of several failure modes, specifications for good results, temperature effects, and testing methods.

Instructor: Matheu J. Carter, P.E.

Registration: Electronically [here](#). We will confirm registrations approximately two weeks before the workshop. Because space is limited to 24 participants, the T²/LTAP Center will allocate seats to as many different agencies as possible.

Fees: State, local, and federal transportation agency employees – FREE
Private sector (consultants, contractors, vendors, etc.) - \$50

Refreshments: Please feel free to bring your own.

Parking: On-site parking is free.

If you need more information, please contact the Delaware T²/LTAP Center at sandiw@udel.edu or 302-540-0917
