## Fundamentals of the Delaware Manual on Uniform Traffic Control Devices (MUTCD)

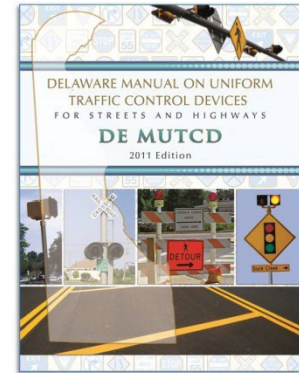

### Training Workshop

**When:**

Thursday, May 1, 2025  
8:00 a.m. to 4:00 p.m.

**Location:**

Delaware Biotechnology Institute  
15 Innovation Way  
Room 102  
University of Delaware  
Newark, DE 19711

**Workshop Overview:**

The Federal MUTCD dates to 1935 and a brand-new version became effective January 18, 2024. However, until the Delaware revision process is completed (no later than January 2026), the Delaware MUTCD, released in July 2011 (last revised May 2018), continues to be the official document for Delaware. This workshop will serve as an introduction to the manual, and it will focus strictly on the organization of the manual and the fundamental concepts of traffic control devices.

With the exception of private roads within gated communities where access is restricted at all times, all roads, pedestrian facilities, bikeways, and private roads open to the public must, by law, strictly comply with the Delaware MUTCD. Traffic control devices include but are not limited to signs, pavement markings, traffic signals, pedestrian signals, cones, drums, and barricades.

This workshop will be taught at the basic level – no prior knowledge of the MUTCD is necessary.

**Registration:** Electronically [here](#). Remaining space is limited to 40 participants, registration is required and if a conflict arises so that you cannot attend, we ask that you advise us so we may offer your seat to anyone that may be on a wait list.

**Fees:** State, local, and federal transportation agency employees – FREE  
Private sector (consultants, contractors, vendors, etc.) - \$100.00

**Refreshments:** Morning refreshments and lunch will be provided.

**Parking:** On-site parking is free.
