

# Questions for You!

---

- ❖ Being a researcher means that you have an ethical obligation to *not* be an activist.
  - ❖ A = strongly agree
  - ❖ B = agree
  - ❖ C = disagree
  - ❖ D = strongly disagree
  
- ❖ If community understandings of environmental hazards and illness are not in-line with the scientific evidence, you have an ethical obligation to tell the community that they are *wrong*.
  - ❖ A = strongly agree
  - ❖ B = agree
  - ❖ C = disagree
  - ❖ D = strongly disagree
  
- ❖ When multiple lines of scientific inquiry in a community do not show evidence of environmentally induced illness, I, as a researcher in the field, should do what?
