

Revisions to the Redding Consortium Interim Plan as of April 29, 2024:

Key Revisions, this version of the interim plan:

- Puts the **removal of the Christina School District (CSD)** from the City of Wilmington into its own section.
- **Removes the specifics around WLC support** in CSD because they are currently undefined. Instead, the WLC is referenced in how the Redding Consortium will engage with the WLC regularly during the creation of the final redistricting plan, see page 9.
- **Removes the modified River Plan** as the chosen framework and provides more space and time for a final decision on a redistricting approach.
- Suggests a **subcommittee structure** for creating the final redistricting plan.
Suggested subcommittees:
 - Operational Impacts Subcommittee
 - Fiscal Impacts Subcommittee
 - Community Engagement Subcommittee
- **Removes a broader recommendation** for action around wraparound services because Redding already has ongoing efforts to support wraparound service grants in Wilmington.
- Makes clear that the **Redding Consortium's intention**, in fulfillment of its redistricting charge, **is to support the educators and community-based organizations** already providing services in Wilmington's schools by building upon their educational investments and supports that are currently working, and working with them to enhance their efforts.
