

Volunteers Needed for a Study Investigating the Potential Link Between Immune Health, Brain Blood Vessel Function, and Cholesterol.

✓ **Participants will Receive:**

- Complete blood panel (e.g., blood sugar, cholesterol)
- Blood pressure screening

✓ **Looking For:**

- Healthy adult men & women (aged 18-29 or 50-64)
- Not currently taking lipid medications

All testing is performed in the **Neurovascular Aging Laboratory** at the University of Delaware's **STAR Health Sciences Complex**.

You will be compensated for your time and effort.

For more information, scan the QR code below or by contact the Neurovascular Aging Lab at **203-583-2442** or deconnet@udel.edu

Thank you!
