Participants needed for

Robot Reaching Experiment #1

Our lab studies how the brain controls movement. We are currently recruiting those with Parkinson's to participate in a reaching experiment. This ~1-hour experiment involves making reaching movements in a virtual reality setup while holding onto a robotic arm.

Eligibility criteria:

- Must be between the age of 18-85 years old
- Free of any musculoskeletal injury/disorder
- No neurological disorder other than Parkinson’s
- No previous brain injury or surgery

Time commitment:

~ 1 hour

Compensation:

$10
