VOLUNTEERS NEEDED FOR PD RESEARCH STUDY

WHAT ARE WE STUDYING?
We are interested in how the nervous system controls fast movements in people with Parkinson's disease who have different motor symptoms.

WHAT WILL YOU DO?
You will come in for a ~1 hour visit which will include:
- Clinical symptom testing
- Performing experimental tests that involve pushing against a force device rapidly
- Insertion of a needle electrode in the muscle between the index finger and thumb to study how the nervous system controls rapid movements

YOU MAY BE ELIGIBLE IF:
- You are a healthy adult or have been diagnosed with Parkinson’s disease
- Age: 40-90

WHERE DOES TESTING TAKE PLACE?
The Motor Neuroscience and Neuroimaging Lab at the University of Delaware STAR Tower

COMPENSATION
$50 amazon gift card for completion of the study
