The Vascular Physiology Laboratory at the University of Delaware is seeking participants for a research study investigating how high blood sodium affects blood vessel and immune cell function.

**You may be eligible if you:**

- Are 40-60 years old
- Have no history of cardiovascular or autoimmune diseases
- Have a resting blood pressure of less than 140/90mmHg
- Are able to attend 3 separate visits to our lab over ~1 month

Participants may be compensated up to $110 for their time.

**Interested?**

Scan the QR code with your phone camera or visit the link below to complete a brief interest survey!
