

## **Help us to learn about the effect of a concussion history on jump-landing and walking tasks**

### **Who is eligible to participate?**

- (1) Physically active individuals aged 18 – 25 with and without a concussion history within the past year
- (2) Without any lower extremity injury history in the past 6 months that resulting in physical activity time loss for more than 3 days
- (3) Without any severe lower extremity injury history that required surgery (ex: anterior cruciate ligament [ACL] tear)

### **Eligible participants will perform the following measures**

- (1) Background health questionnaire
- (2) Jumping and walking assessment

The testing will occur on the STAR campus at the University of Delaware in one session requiring 3 hours. If you are interested in learning more and how you can enroll, please get in touch with
