

Help Us Learn More About Stuttering!

A multi-site study of brain structure variations
in children who stutter

Who is eligible?

- 6-13 years old.
- Currently having symptoms of stuttering, but a formal diagnosis is not required.
- Those with a history of speech difficulty are also welcome.
- Normal language development.
- No history of cognitive or neurological impairments.
- Not taking medication affecting brain functions.
- Other limited criteria apply – please inquire.

Participants will take part in:

- Language assessments
- Speech motor skill evaluations
- Brain scans (Magnetic resonance Imaging)

Compensation:

- Participants may receive up to a total of \$140 for 2 visits for compensation.
- Participants may be compensated for travel expenses.
