Interested in Becoming a Physical Therapist?

University of Delaware Physical Therapy Program

UDPT program strives to provide the highest quality education for graduate students interested in pursuing a Doctor of Physical Therapy (DPT) degree. Accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE), the program also offers interested students a chance to pursue a PhD within an Interdisciplinary Program in Biomechanics and Movement Sciences.

Why Choose UDPT?

- Ranked as one of the top graduate Physical Therapy programs in the country #2 US News and World Report
- Join a profession in which employment is expected to grow by 30% through 2018
- 2.5 year program - you graduate and search for jobs sooner (most other programs are three years)
- Abundant hands-on experience for learning! Three full time internships at outside sites and three part-time internships within UD's PT Clinic, spread out over the course of your didactic education.
- World-renowned and accessible faculty: numerous APTA board certified specialists and PhD level educators teaching classes and directing clinical learning
- 100% passing rate for students on the Physical Therapy licensing exam
- The opportunity to get involved in ground-breaking research, conducted by faculty
- Residency programs in UD's clinic offering a great experience for current PT's looking to further their education

Hands-On Exposure to the various Practice Areas within Physical Therapy

Choose from among the 400 facilities around the country with which UDPT is affiliated for clinical experiences in environments, including:

- Sports and orthopedics
- Neurological and older adult
- Acute care
- Pediatrics
- Outpatient orthopedics
- In-patient rehabilitation
- A final elective site, in the field of your choice
