

# Bring the Power of CRISPR to Your Research

OCTOBER 3, 2019 12:00 PM – 1:30 PM  
COLBURN LAB, ROOM 366

We hope you can join us to learn more about the easiest way to start using CRISPR in your research. See how your lab can use genome engineering to drive your research forward and accelerate discoveries.

Register for our seminar to learn how you can best utilize Engineered Cells and CRISPR Revolution Kits in your research with new, affordable, and guaranteed solutions from Synthego.

Join the Synthego Team to learn about:

- How to Design, Edit and Analyze your CRISPR Experiment
- Easy Solutions to Generate Cell Lines
- Fastest Path to Use CRISPR in Your Research

**Space is limited. Lunch will be provided.**
