.

very frustrating that we were not given a canvas page and had to calculate our own grade for the entire semester that was still not completely accurate very hard to review for exams

Sometimes unorganized especially with dates and deadlines. Had a majority of homeworks and exams extended a day or even hours before they were due. We once came into class ready for an exam for him to come in and tell us that the exam was moved.

I felt that the grading was a bit tough, especially for homework. A majority of my 200 and 300 level math courses have a bit easier grading scale for homework which helps manage the exams a bit more considering those are the only assignments we have.

Teacher was awesome

No

.

-changed deadlines often -assigned a homework due on reading day -had to do everything his way to get full credit -doesn't curve any exams even when the class average is a C or D

n/a

I felt that there was a bit lack of organization over all with the course. It was not to the point where it impacted my ability to succeed in the class although, I think it would be very beneficial to the student to have the following reformations. A majority of my professors use alternative academic sources, (such as google drive or udel PO box) rather than canvas and makes it very hard to navigate courses. This semester we had used google drive and none of our graded assignments were able to be posted, though returned in person, it was unnecessary to have to use an equation and calculate your grade based off of paper exams and assignments provided throughout the semester. I also believe that there was not enough resources provided to properly prepare for exams. While the textbook was helpful in some aspects, I felt that it did not cover as much material as we did in class which impacted my studying and thus grades. He was very resourceful in office hours but it became hard to manage the amount of office hours I needed with my other courses early on in this semester.

Class was always engaging and interesting

no

Question ID: 18309

What advice would you give the students that will take this course next semester ?

Responses (7 of 11)

.

don't expect to get a good grade unless you go to office hours and do every homework problem with him

Study very very hard. And go to office hour evrytime ÷

Read the textbook.

Practice doing example problems and review the basics of discrete math.

Rewrite your notes and go to office hours

just work hard u will get grade A

Question ID: 21159

How would you rate the additional materials provided (the book draft in particular) ? Please write what you liked and what you didn't like.

Responses (6 of 11)

The textbook was useful for studying for exams

book had relevant content...I'd give it an 8/10 liked how it was overwhelmingly long wish there were answers provided to some of the exercises

The book draft overall was quite helpful in my understanding.

I liked the book for examples, wish it had a little bit more explanation or introduction to topics as defining certain material.

The book was very easy to follow and very helpful when doing homework and preparing for tests
i like it
