Faculty Job Satisfaction Survey

as administered Fall 2019

Purpose

This document provides the detailed explanation of the COACHE Faculty Job Satisfaction Survey. Readers should use this document to understand the specific language of questions, design and ordering of sections. For a more detailed understanding of the survey adaptive branching, scales, and additional programming notes, please refer to the survey codebook.

Adaptive Branching and Survey Programming

The survey is designed with complex adaptive branching to ensure that survey respondents only answer questions that directly relate to their background and experience. Survey adaptive branching occurs based on the following characteristics:

- Institutional Type: Research Universities and Large Masters Institutions, Baccalaureate and Small Masters Institutions; Community Colleges
- Rank: Instructor/Lecturer, Assistant, Associate, Full
- Tenure status: Full-time non-tenure-track, Pre-tenure, Tenured
- Clinical Appointment Type: Clinical Medical Faculty

You will be able to identify the programming instructions by looking at text in a maroon font or by looking for text in all caps surrounded by brackets.

While this document attempts to provide detailed descriptions of the full survey instrument, there are some details that are omitted for the sake of brevity and clarity.

In a few instances throughout the survey questions are asked based on the responses to a prior question. For the sake of brevity and clarity, we may have omitted the programming instructions but when this occurs the second question references the prior response (e.g. “You indicated dissatisfaction with the portion of your time spent on the following activity or activities. Please indicate whether you feel you spend too much or too little time on:”) The document also excludes interstitial text, and programming instructions for randomization of item sets.

Scales

The majority of items in the survey are five-point Likert scale items. Rather than repeat the scales throughout the entire document, the full scales are detailed at the end of this document. Within the survey, you will find the scale type referenced immediately below the items it references. You will also see the nonresponse options listed below the items. Pay particular attention to these options. Along with the means and frequencies, nonresponse options can be helpful in understanding the data. For example, if faculty report that a policy or program is not offered at your institution, when in fact it is, that reveals something about the awareness and/or quality of the policy or program. Full text of response options is always included when it does not align with a standard five-point Likert scale.
