PHYSICAL THERAPIST STUDENT EVALUATION:

CLINICAL EXPERIENCE AND CLINICAL INSTRUCTION

June 12, 2003

American Physical Therapy Association Department of Physical Therapy Education 1111 North Fairfax Street Alexandria, Virginia 22314

PREAMBLE

The purpose of developing this tool was in response to academic and clinical educators' requests to provide a voluntary, consistent and uniform approach for students to evaluate clinical education as well as the overall clinical experience. Questions included in this draft tool were derived from the many existing tools already in use by physical therapy programs for students to evaluate the quality of the clinical learning experience and clinical instructors (CIs), as well as academic preparation for the specific learning experience. The development of this tool was based on key assumptions for the purpose, need for, and intent of this tool. These key assumptions are described in detail below. This tool consists of two sections that can be used together or separately: Section 1-Physical therapist student assessment of the clinical experience and Section 2-Physical therapist student assessment of clinical instruction. Central to the development of this tool was an assumption that students should actively engage in their learning experiences by providing candid feedback, both formative and summative, about the learning experience and with summative feedback offered at both midterm and final evaluations. One of the benefits of completing Section 2 at midterm is to provide the CI and the student with an opportunity to modify the learning experience by making midcourse corrections.

Key Assumptions

- The tool is intended to provide the student's assessment of the quality of the clinical learning experience and the quality of clinical instruction for the specific learning experience.
- The tool allows students to objectively comment on the quality and richness of the learning experience and to provide information that would be helpful to other students, adequacy of their preparation for the specific learning experience, and effectiveness of the clinical educator(s).
- The tool is formatted in Section 2 to allow student feedback to be provided to the CI(s) at both midterm and final evaluations. This will encourage students to share their learning needs and expectations during the clinical experience, thereby allowing for program modification on the part of the CI and the student.
- Sections 1 and 2 are to be returned to the academic program for review at the conclusion of the clinical experience. Section 1 may be made available to future students to acquaint them with the learning experiences at the clinical facility. Section 2 will remain confidential and the academic program will not share this information with other students.
- The tools meet the needs of the physical therapist (PT) and physical therapist assistant (PTA)
 academic and clinical communities and where appropriate, distinctions are made in the tools to reflect
 differences in PT scope of practice and PTA scope of work.
- The student evaluation tool should not serve as the sole entity for making judgments about the quality
 of the clinical learning experience. This tool should be considered as part of a systematic collection of
 data that might include reflective student journals, self-assessments provided by clinical education
 sites, Center Coordinators of Clinical Education (CCCEs), and Cls based on the Guidelines for
 Clinical Education, ongoing communications and site visits, student performance evaluations, student
 planning worksheets, Clinical Site Information Form (CSIF), program outcomes, and other sources of
 information.

Acknowledgement

We would like to acknowledge the collaborative effort between the Clinical Education Special Interest Group (SIG) of the Education Section and APTA's Education Department in completing this project. We are especially indebted to those individuals from the Clinical Education SIG who willingly volunteered their time to develop and refine these tools. Comments and feedback provided by academic and clinical faculty, clinical educators, and students on several draft versions of this document were instrumental in developing, shaping, and refining the tools. Our gratitude goes out to all of those individuals and groups who willingly gave their time and expertise to work toward a common voluntary PT and PTA Student Evaluation Tool of the Clinical Experience and Clinical Instruction.

<u>Ad Hoc Group Members:</u> Jackie Crossen-Sills, PT, MS, Nancy Erikson, PT, MS, GCS, Peggy Gleeson, PT, PhD, Deborah Ingram, PT, EdD, Corrie Odom, PT, DPT, ATC, and Karen O'Loughlin, PT, MA

SECTION 1: PT STUDENT ASSESSMENT OF THE CLINICAL EXPERIENCE

Information found in Section 1 may be available to program faculty and students to familiarize them with the learning experiences at this clinical facility.

1.	Name of Clinical Education Site Northeast Reh	<u>ahb</u>			
	Address29 Northwest Blvd	City <u>Nashua</u>	State	<u>NH</u>	
2.	Clinical Experience Number 2				
3.	Specify the number of weeks for each applicab	le clinical experience/rota	ition.		
	12 Acute Care/Inpatient Hospital Facility Ambulatory Care/Outpatient ECF/Nursing Home/SNF Federal/State/County Health Industrial/Occupational Health Facility	Private Practice 12 Rehabilitation/Sub- School/Preschool Wellness/Preven Other	ol Progra	am	
<u>Orienta</u>	<u>ntion</u>				
4.	Did you receive information from the clinical fac	cility prior to your arrival?	\boxtimes	Yes [□No
5.	Did the on-site orientation provide you with an a information and resources that you would need		\boxtimes	Yes [□No
6.	What else could have been provided during the start day 1 of clinical	orientation? NRH had m	ie very w	vell prepa	red to
<u>Patient</u> ,	/Client Management and the Practice Environme For questions 7, 8, and 9, use the following 1= Never 2 = Rarely		4 = Ofte	en	

7. During this clinical experience, describe the frequency of time spent in each of the following areas. Rate all items in the shaded columns using the above 4-point scale.

Diversity Of Case Mix	Rating	Patient Lifespan	Rating	Continuum Of Care	Rating
Musculoskeletal	4	0-12 years	0	Critical care, ICU, Acute	0
Neuromuscular	4	13-21 years	1	SNF/ECF/Sub-acute	1
Cardiopulmonary	4	22-65 years	3	Rehabilitation	4
Integumentary	3	over 65 years	4	Ambulatory/Outpatient	0
Other (GI, GU, Renal,	3			Home Health/Hospice	0
Metabolic, Endocrine)				Wellness/Fitness/Industry	0

8. During this clinical experience, describe the frequency of time spent in providing the following components of care from the patient/client management model of the *Guide to Physical Therapist Practice*. Rate all items in the shaded columns using the above 4-point scale.

Components Of Care	Rating	Components Of Care	Rating
Examination		Diagnosis	4
Screening	4	Prognosis	3
History taking	4	Plan of Care	4
Systems review	4	Interventions	4
Tests and measures	3	Outcomes Assessment	4
Evaluation	4		•

9. During this experience, how frequently did staff (ie, CI, CCCE, and clinicians) maintain an environment conducive to professional practice and growth? Rate all items in the shaded columns using the 4-point scale on page 4.

Environment	Rating
Providing a helpful and supportive attitude for your role as a PT student.	4
Providing effective role models for problem solving, communication, and teamwork.	4
Demonstrating high morale and harmonious working relationships.	4
Adhering to ethical codes and legal statutes and standards (eg, Medicare, HIPAA,	4
informed consent, APTA Code of Ethics, etc).	
Being sensitive to individual differences (ie, race, age, ethnicity, etc).	4
Using evidence to support clinical practice.	4
Being involved in professional development (eg, degree and non-degree continuing	4
education, in-services, journal clubs, etc).	
Being involved in district, state, regional, and/or national professional activities.	4

10. What suggestions, relative to the items in question #9, could you offer to improve the environment for professional practice and growth? None. NRH nashua had an awesome staff that was always more than willing to help educate and guide me when needed. I was also treated with respect and viewed as another staff member who they looked at for consultation and confirmation regarding patients.

Clinical	<u>Experience</u>
11.	Were there other students at this clinical facility during your clinical experience? (Check all that apply):
	 ☐ Physical therapist students ☐ Physical therapist assistant students ☐ If the physical therapist assistant students ☐ If the physical therapist students ☐ If the physical therapis
12.	Identify the ratio of students to CIs for your clinical experience:
	 1 student to 1 CI 1 student to greater than 1 CI 1 CI to greater than 1 student; Describe
13. 14.	How did the clinical supervision ratio in Question #12 influence your learning experience? One to one works well for me, espeically in this setting when really knowing your patients is a big part of a successful rehab and also helped me progress daily with my skills. There were a few days where my CI was out and I got to shadow/treat alongside another PT which was beneficial to see her approach and rationale for treatment and be able to pick someone elses brain in depth. In addition to patient/client management, what other learning experiences did you participate in
14.	during this clinical experience? (Check all that apply)
	 Attended in-services/educational programs Presented an in-service Attended special clinics Attended team meetings/conferences/grand rounds Directed and supervised physical therapist assistants and other support personnel
	 □ Observed surgery □ Participated in administrative and business practice management □ Participated in collaborative treatment with other disciplines to provide patient/client care (please specify disciplines) co treats with OT, and recreational therapy- out-trips w/ OT
	and RT as well. □ Participated in opportunities to provide consultation □ Participated in service learning □ Participated in wellness/health promotion/screening programs
	a. a. pate nomicocinicatar promotionos coming programo

	☐ Performed systematic data collection as part of an investigative study ☐ Other; Please specify
15.	Please provide any logistical suggestions for this location that may be helpful to students in the future. Include costs, names of resources, housing, food, parking, etc. Is about a 25 minute drive from south campus off exit 8 of route 3. Parking is free and plentiful. There is a café on site which provided some good food and was fairly cheap.
<u>Overall</u>	Summary Appraisal
16.	Overall, how would you assess this clinical experience? (Check only one)
	Excellent clinical learning experience; would not hesitate to recommend this clinical education site to another student.
	Time well spent; would recommend this clinical education site to another student.
	Some good learning experiences; student program needs further development.
	Student clinical education program is not adequately developed at this time.
17.	What specific qualities or skills do you believe a physical therapist student should have to function successfully at this clinical education site? IP rehab requires a student to be greatly versatile. Be

- prepared to think on your feet with patient statuses changing frequently and needing to make modifications to your plan. Also, there is a lot to learn in the rehab setting. Every eval, I learned something new about treating a different population. You will leave this clinical knowing a whole lot more than you would ever think possible, and also that there is still a lot more to be learned and improved upon, but I was told that is the way inpatient works.
- 18. If, during this clinical education experience, you were exposed to content not included in your previous physical therapist academic preparation, describe those subject areas not addressed.

 There are a lot of little things in IP that are not discussed in school that you will learn on this rotation.
- 19. What suggestions would you offer to future physical therapist students to improve this clinical education experience? come in knowing sternal, cardiac, hip, WB, aspiration, and infection control precautions. Also, a good review of cardiopulmonary and neuro notes wouldn't hurt.
- 20. What do you believe were the strengths of your physical therapist academic preparation and/or coursework for *this clinical experience*? Evaluation and pathophysiology
- 21. What curricular suggestions do you have that would have prepared you better for this clinical experience? more neuro lab time focused on treating impairments and just dealing with patients in general instead of learning all the PNF patterns that I used on 2 patients.

SECTION 2: PT STUDENT ASSESSMENT OF CLINICAL INSTRUCTION

Information found in this section is to be shared between the student and the clinical instructor(s) at midterm and final evaluations. Additional copies of Section 2 should be made when there are multiple CIs supervising the student. Information contained in Section 2 is confidential and will not be shared by the academic program with other students.

Assessment of Clinical Instruction

22. Using the scale (1 - 5) below, rate how clinical instruction was provided during this clinical experience at both midterm and final evaluations (shaded columns).

1=Strongly Disagree 2=Disagree 3=Neutral 4=Agree 5=Strongly Agree

Provision of Clinical Instruction	Midterm	Final
The clinical instructor (CI) was familiar with the academic program's objectives and expectations for this experience.	5	5
The clinical education site had written objectives for this learning experience.	5	4
The clinical education site's objectives for this learning experience were clearly communicated.	5	5
There was an opportunity for student input into the objectives for this learning experience.	5	4
The CI provided constructive feedback on student performance.	5	5
The CI provided timely feedback on student performance.	5	5
The CI demonstrated skill in active listening.	5	5
The CI provided clear and concise communication.	5	5
The CI communicated in an open and non-threatening manner.	5	5
The CI taught in an interactive manner that encouraged problem solving.	5	5
There was a clear understanding to whom you were directly responsible and accountable.	5	5
The supervising CI was accessible when needed.	5	5
The CI clearly explained your student responsibilities.	5	5
The CI provided responsibilities that were within your scope of knowledge and skills.	5	5
The CI facilitated patient-therapist and therapist-student relationships.	5	5
Time was available with the CI to discuss patient/client management.	5	5
The CI served as a positive role model in physical therapy practice.	5	5
The CI skillfully used the clinical environment for planned and unplanned learning experiences.	5	5
The CI integrated knowledge of various learning styles into student clinical teaching.	5	5
The CI made the formal evaluation process constructive.	5	5
The CI encouraged the student to self-assess.	5	5

The discussion as a positive rate mean in projection are tapy produces	•	_
The CI skillfully used the clinical environment for planned and unplanned learning experiences.	5	5
The CI integrated knowledge of various learning styles into student clinical teaching.	5	5
The CI made the formal evaluation process constructive.	5	5
The CI encouraged the student to self-assess.	5	5
Was your Cl'(s) evaluation of your level of performance in agreement with y Midterm Evaluation ☐ Yes ☐ No Final Evaluation ☐ Yes ☐		essment?

24.	If there were inconsistencies, how were they discussed and managed?
	Midterm Evaluation
	Final Evaluation
25.	What did your CI(s) do well to contribute to your learning?
	Midterm Comments the first 6 weeks I was slowly and comfortably increased with independence in treating patients and was taking in a whole lot of new information and guidance from my CI at the same time.
	Final Comments By the end, I became fully independent with a 6 patient caseload and would treat without my CI over my shoulder. If i needed guidance or confirmation I could always go find my CI in the office for input. She did a great job of meeting my learning style, fostering a good environment for open communication, and provided proper criticism, feedback, and input as needed. She stimulated my thinking process with questions of patient management behind the scenes to bolster my knowledge and rationale, and sometimes would not answer questions and make me problem solve through by the end of clinical. It was an awesome learning experience.
26.	What, if anything, could your CI(s) and/or other staff have done differently to contribute to your learning?
	Midterm Comments nothing.
	Final Comments nothing
	you for sharing and discussing candid feedback with your CI(s) so that any necessary urse corrections can be made to modify and further enhance your learning experience.
