

# HELP US LEARN ABOUT THE BRAINS OF CHILDREN WITH ADHD!

## WHO CAN PARTICIPATE?

**You and your child may be eligible to participate if:**

- Your child has ADHD,
- Your child is age 7-11,
- Your primary home language is English.

**FILL OUT A BRIEF SCREENING FORM**

## WHAT HAPPENS DURING THE VISIT?

One 3 hour in-person visit on the UW-Milwaukee campus.

Your child will do some puzzle-like activities and games.

Your child will wear some equipment on their head during some of these tasks. This is called **EEG**.

You will fill out some questionnaires about your child.

## WHAT IS EEG?

Electroencephalography (EEG) is a **noninvasive** neuroimaging technique. **No pokes, pricks, or anything painful is involved.**

Your child will wear a cap that looks and feels like a swim cap. We will then apply some gel to the scalp to help the sensors read your child's brain waves.

## COMPENSATION & BENEFITS

\$40 gift card and a choose a book to take home for each child.

Option to request a summary of your child's performance on the brief developmental screening measures.

Help contribute to science!
