

Jobscan

What is it?

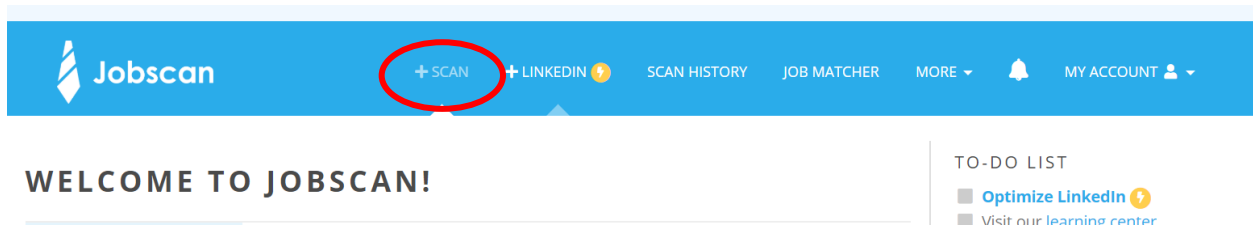

Jobscan is a website that uses Applicant Tracking System (ATS) technology to analyze how closely your resume aligns with a job posting.

Is Jobscan's algorithm based on a real Applicant Tracking System?

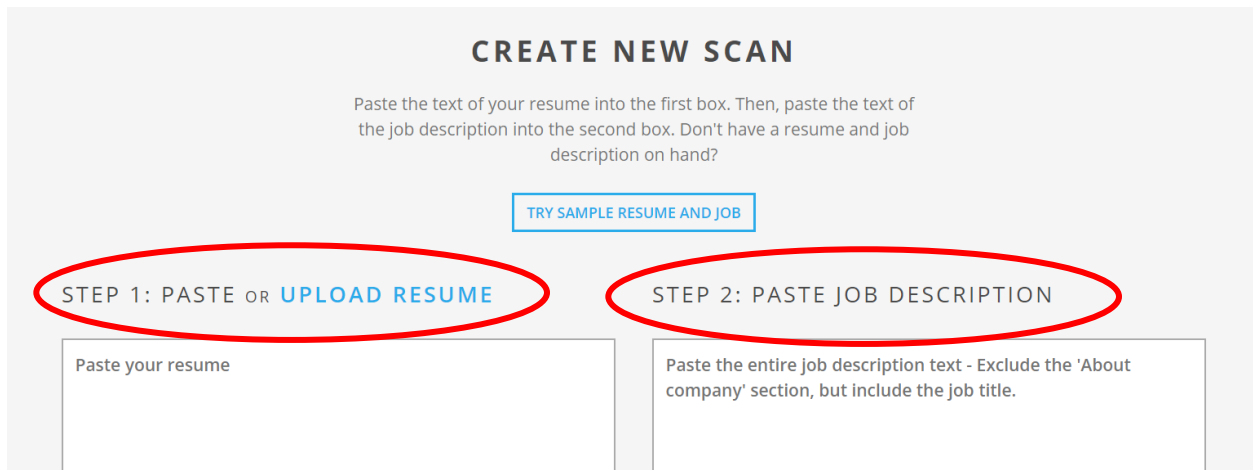

Yes. There are more than 300 ATS vendors in the marketplace, and we have identified the commonalities among the top ATS used by Fortune 500 companies such as Taleo, iCIMS, Jobvite, and more. The common denominators among ATS are keyword searches, keyword frequency, keyword ratios, exact-match keywords, resume content parsing, and match rate. We continue to fine tune Jobscan with similar algorithms on a regular basis.

How do I use it?

1. Go to <https://www.jobscan.co/>
2. Click on the +Scan tab

3. Copy and paste your resume into one panel and the job description you are applying to into the other panel.

4. Then press SCAN

The image shows a screenshot of the Jobscan interface. At the top, there are two empty text input fields. Below the left field is a blue link labeled "Clear resume". Below the right field is a blue link labeled "Clear job description". In the center, there is a blue button with the word "SCAN" in white capital letters, which is circled in red. Below the "SCAN" button is a checkbox with the text "Make my resume searchable to recruiters" and an information icon to its right.

Jobscan will provide you with a score expressing how closely your resume aligns with the job description you selected. Jobscan will recommend ways to improve your content and formatting that will increase your score and improve your chances of getting an interview.

What is a good score?

80% is a good score.

Does Jobscan cost anything?

You get **5 free scans** per email address per month with a free membership.

Wow! In addition to scanning my resume, Jobscan has information about resume writing, job searching, and LinkedIn optimization. Where do I start?
